This looming scandal could ruin the 44th President and disrupt the entire country... [Get Full Access Now](#)

About S&A Investment Research

Porter Stansberry founded Stansberry & Associates Investment Research, a private publishing company based in Baltimore, Maryland, in 1999. His monthly newsletter, *Stansberry's Investment Advisory*, deals with safe value investments poised to give subscribers years of exceptional returns.

Porter oversees a staff of investment analysts whose expertise range from value investing to insider trading to short selling. Together, Porter and his research team do exhaustive amounts of real-world, independent research. They've visited more than 200 companies in order to find the best low-risk investments in the world.

And they've built their reputation on a type of controversial analysis you rarely see in the mainstream press... designed to help the general public understand what's really happening in our country's most important institutions – like in the stock market, in our hospitals, or deep inside our banks and insurance companies.

Porter's proven ability to gather this kind of critical information and his willingness to publish it – no matter what – is why his newsletter has become indispensable to so many people around the world... folks who've learned to not always trust what they read in the paper or see on TV.

But it's also come at a significant cost...

Porter has been threatened with major lawsuits by the Social Security Administration... Wal-Mart... a famous Boston University Professor... and a big law firm, just to name a few. In total, he's been threatened with over \$20 billion worth of damages in lawsuits – lawsuits that could have left him penniless.

But in a world of government-manipulated paper money, self-serving financial institutions, and captured regulatory agencies that would like his research to never see the light of day... Porter and his staff have managed to reach nearly a million readers in over 120 countries. They've leveled the playing field between Stansberry & Associates subscribers and the institutions of government and finance that routinely seek to exploit them.

The safest place to sit on an airplane...

What to do if someone starts shooting in a public area... how to protect yourself from epidemics, and much more in this brand new **FIELD MANUAL** from Dr. David Eifrig.
