About Me...

I truly believe that I am being utilized as a vehicle of change in the health and wellness arena and that through this Vemma experience I am being allowed to transform many lives international capacity towards better health and overall wellness. In this way my life and mission has been multiplied to reach many as opposed to only serving in one local area. The Vemma experience allows the ordinary man a chance to do extraordinary things while simultaneously improving his overall physical health. What better gift could be offered to a human being than a gift of health and wealth? What good is all the wealth in the world if you do not have the health to enjoy it? I see this experience as a lifetime calling and I pursue it with both passion and vigor. I am determined to fulfill and achieve my set and written goals. My message is a message stemming from my back round as a medical doctor seeking for real answers as to opposed to merely following the traditional allopathic model. Vemma offers an integrative approach to modern medicine by providing raw material which can be harnessed by the human body allowing it to heal itself. I encourage everyone to take a solid look at mangosteen when searching for answers in the health arena. Welcome to the Mangosteen Revolution, it is perhaps the single greatest revolution of our times! Mangosteen will be bigger without a doubt than aloe vera ever was when it first bursted onto the scene in 1978.

Why I Do This...

My passion for spreading an disseminating health related information all around the globe. I therefore take it seriously and do it passionately. This experience is in complete alignment with this goal affording me a chance to explore the world and follow passion. This information is empowering both from a health and as financial perspective. It leads to upliftment of self and to the development of financial security allowing individuals to leave a legacy to their respective families for generation yet unborn. Hippocrates said it best when he said "Let food be your medicine and medicine be your food!" 320BC.
