Can I use my "E Cigarette, E-Cig, tsunami " anywhere?

Modified on: Thu, 18 Sep, 2014 at 4:07 PM

Your E-Cig emits only water vapor. Currently, there is no federal regulation concerning the use of your personal vaporizer as they do not currently fall under the tobacco ban. Electronic cigarettes are currently not subject to restriction under the Nevada Clean Indoor Air Act. Of course, you should always abide by the local laws and wishes of the establishment you are vaping in. IWe have always explained the device and have taken it apart showing what it actually is. After this demonstration, the establishment has always allowed us to continue use..
