We are aware that some customers have been targeted by a texting scam that appears to be similar to several recent industry attempts. Our critical systems and customer data remain secure. We have alerted customers who received this text to delete it and not open it or follow any links that are attached. As part of our security and privacy safeguards, we continually remind customers that reputable organizations will never request personal or confidential information via email or text.

We are working closely with business partners to bring down/remove the fraudulent websites. Customers with questions should contact our Customer Care Center at 1-800-325-2424.
