ALLERGIES 1

1. "On Monday night I half-awakened at 2:30 am with itching eyes, and I was rubbing them. Strange, I thought, I only itch like this in the Spring and this is Fall. Then I noticed that my eyes felt VERY swollen, then my lips and the upper palate of my mouth. I dragged myself out of bed and looked in the bathroom mirror - I barely recognized the face that looked back at me, and I could feel the swelling progressing. Within the next few minutes my nose swelled completely shut and I had to breathe through my mouth. Nothing like this had ever happened to me before, but having been a nurse for over 25 years, I knew the signs meant I was having a sudden, severe allergic response to something. I haven't had any prescription medications in my house for over 10 years. The first thing my foggy brain could think of was to take a couple of transfer factors and put its immune modulating properties to the test. I went back to bed and started watching myself and praying. I didn't want to go to the ER unless absolutely necessary, but if my tongue started to swell or if my chest started getting tight, I'd have to. About 5 or 6 minutes after I took the transfer factors, I felt that my symptoms had stopped worsening. Good. That gave me time to wake up and think. I could still breathe through my mouth and talk with effort. I woke up my roommate and told her what was up. She about fainted when she saw my face, but she dressed and took me to a local pharmacy where she talked the cleaning people into giving her some Benadryl. I didn't know the store wasn't opened all night anymore. I took 2 while we waited in the parking lot to see if the swelling would start reversing. If not then we were heading to the ER. Fortunately the Benadryl did start reducing the swelling and I was able to go home. By the next morning I was able to see my physician. Today (Wednesday) I'm back to a light day of work, but now I have injectable epinephrine that I will have to learn to keep with me in case this happens again. I feel extremely fortunate and grateful that I'm a very healthy person, that I knew what was happening and what needed to be done, and I had transfer factors in my refrigerator. If I hadn't taken transfer factors as I did, I would have HAD to go straight to the ER. I don't recommend this method of handling anaphylaxis, so please don't use my story to suggest that. I'm just telling you that this is what I did, upon waking in the middle of last Monday night. And I'm still here to tell about it." Sharon Burch

2. "For the past fifteen years I have suffered from chronic bronchitis, regular sinus infections, and severe allergies. I suffered from fatigue, migraine headaches, joint pain, and an overall weakening. After eight months transfer factors, I am a new person. I feel like transfer factors saved my life. I tried every nutrient that I could find, but only transfer factors made the difference." Naomi Jackson, Kansas

3. "I have suffered from severe allergies for years. My allergist placed me on allergy shots and I took

Claritin. After two years the shots were not accomplishing what my allergist had intended. I began to consume transfer factors. My allergist noticed a major drop in my blood markers for allergies. He ask me what I was doing. I told him about transfer factors. He decided to do a short clinical study on me. He told me to go off everything for three months. At the end of three months he placed me on nine capsules of transfer factors for six months. At the end of six months he was astounded and made the comment, 'it is like you don't even have allergies'."Bettina

4. "I suffered with severe allergy symptoms for 8 years. Anytime there was a high pollen count I would experience swelling, itchy, red eyes, and terrible sneezing fits. I originally began taking transfer factors to boost my immune system because I had an infection. Transfer factors also balance the immune system. I took 15 per day for the first three days, then 7 per day after that. Within 10 days, I felt great. I have not experienced symptoms from my allergies for 15 months. I maintain a dose of only three per day."Chris M.

5. "For over 30 years I have suffered from chronic sinus infections, ear infections and allergies. The doctors gave me everything and I have taken every over the counter product, nothing helped. These few months were so bad that my jaw hurt. About two years ago I developed arthritis in both pinkies and the joints swelled. There was also fluid coming out of one of the joints causing a permanent blister and it was painful. The doctors said all they could do was operate and maybe it would help. I said " no thank you, I wasn't going to have my fingers sliced on a maybe. I like my fingers" Two weeks ago I started on the Transfer Factor, Transfer Factor Plus and Transfer Factor Cardio. I was amazed to see that after only such a short time the pain in my ears is gone, my sinus infections are gone and my are allergies gone. No more waking up coughing and with severe pain in my head and nose. That's not all, the joints in my fingers are almost back to normal size, no more pain and the fluid is no longer coming out, in fact it is drying up. I have taken many other products in the past but I have never seen anything as powerful as these. Thank you Mike and Thank you 4 life for bringing them to me. Thank GOD my wife is healthy and I have started her on all the products to keep her that way. The world must know about these products. I believe they will save lives and help so many suffering people, My mission is to tell everyone. Thank you again!"Ed Bernstein

6. "My family and I have had a history of allergies. I tried allergy shots for 5 years to see no improvement in my condition. After trying every known antihistamine and antibiotic, I turned to alternative remedies. Recently I had been experiencing hives daily for three months. I had tried a number of remedies with no effect until I heard about transfer factors. After taking the transfer factors for only two days the hives went away and haven't returned. My sinuses and scratchy voice have cleared and I have received several other side benefits as well including a renewed energy level. Yes, I want the world to know about this incredible medical breakthrough!"Bill Ormesher

7. "My 5-year-old was always sick and we had tried everything. We started transfer factors and immediately noticed results! It has been a year and he is doing wonderful! He has only been sick 2 times where he needed a prescription, this is a miracle for us! Though he does still have developmental problems, he has made tremendous progress in learning and understanding. I know that if he was not taking transfer factors he would not be doing so well. This has really changed our lives! I have had terrible allergies all my life, I am allergic to many foods, plants and smells. But I have not had ANY reactions since I started on transfer factors. If I do feel like I am going to react to something, I just add a few more to my daily intake. So you can really see that without these products my life would be so much worse!"Kristy Griewahn

8. "For years I was very allergic to orange juice. If I drank just a little my throat would itch and swell. If I tried to clean the closet I would sneeze like crazy. After being on transfer factors for several months, I can drink orange juice and I cleaned the closet the other day without sneezing.It is like a miracle."Hanif Kahn

9. "I have had a serious allergy problem for several years. I got so sick I stayed in bed for days. I just didn't feel like doing anything. I felt drained, depressed, and irritable. I experienced one infection after another. It would start in my sinuses and spread to my ears and chest. I tried every nutrient that I would hear about. Among the many products I tried Goldenseal, Echinacea, Ambrotose, Biomune OSF, Ag-Immune, Life Enhancer, Immuncical, TriVita Complete, and a score of other popular nutrients. None of them made a difference. Finally, I tried transfer factors. Within two weeks I felt better and after a couple months I felt like

a new person. I feel energized."Mary Martin

10. "I am a registered nurse, 64 years old and respect what medications can do. However, prescriptions were not helping my severe allergies or my psoriasis. Allergic episodes usually resulted in a mega-infection of bronchitis or a sinus infection. My psoriasis did not respond to either of many medications. Both of these health problems are in the auto-immune category. I included 4 capsules of Choice 50 and 3 transfer factors in my daily supplements. I feel great now! Choice 50 and transfer factors are a dynamic combination that have truly improved the quality of life."Doreen Lassiter

11. "My nine-year-old daughter had allergies and problems sleeping because of them. She basically spent most of the day sneezing, blowing her nose and complaining of the heavy head feeling, and flu-like symptoms also. She loves animals, and we have this bunny that we were going to have to get rid of because she just couldn't even be in the same room with him. It was that bad. My chiropractor recommended my daughter take transfer factors also. So we've been on it for several months and actually, very quickly she started saying, "You know, I don't feel the heavy feeling, I don't feel tired anymore." She's sleeping wonderfully. She doesn't sneeze. She hasn't any reaction to the bunny. It's absolutely fine to be in the same room with him (the bunny). As for me, I don't cough and sneeze and clear my throat constantly any more where I used to, nor do I have chronic post nasal drip, congestion and flu-like symptoms related to my allergies and problems sleeping. I was really impressed with this. However a couple of days ago, after being on it for quite some time, I ran out of it. My daughter stated she was not feeling well. I'm starting to get all those feelings back again. I called the chiropractor, I called my up line, I called several people and nobody had a spare bottle transfer factors. I was without it, I would say for a couple of days. And I just got progressively worse. I was very sluggish like I had the flu, my allergies, everything in full bloom again. So I ended up getting a hold of the bottle from a friend. I came home and I took three capsules and I gave one to my daughter. Within a half-hour, all my symptoms lifted. My nose cleared out. My head cleared. I didn't have the headaches anymore. Everything just disappeared within a half-hour."Kim E.

12."I have a small health food store and transfer factors have been the greatest product that I have come across in ten years. I've never had anything that's given me the constant feedback that transfer factors have for allergies, asthma, chronic sinus infections, colds and flues--just on and on. I'm just so grateful to have come upon this and I thank my up line."Diana H.

13. "Transfer factor helped my allergies and my snoring."Les W.

14. "I just wanted to let folks know that when I first heard about the product I was quite intrigued. We're real believers in supplementation and taking responsibility for our own health, and we got the family on it, and what I first noticed in about nine days on the product my son, who has asthma, came off his inhalers. We didn't want to mess around with that so we got him back to the allergist, and his lung function had gone up to the low normal range. I had him in for his 15 year-old checkup and in fact he is back in the high normal range. My daughter who was eight at the time with severe allergies, in three days all symptoms cleared up. And my wife, who has a history of sinus infections, during her last sinus infection back before Labor Day got on transfer factors and in 24 hours knocked it out of her system. When I saw that I realized that we were really sitting on top of a gold mine and really had a reason and a real desire to get out there and tell the story." Kevin O'Conner

15. "I have a 9 year-old son who suffers with asthma and allergies and he's been on treatment for up to right at five years. About two months ago, he started having horrible asthma attacks, seemingly for no reason at all. He had a lot of problems with his allergies again, even though he was five years into the treatment and they are supposed to be working their way away. The pediatrician and the allergist really couldn't figure out how to stop this flare up in particular. They decided that maybe he had an infection so they put him on an antibiotic. They changed all his allergy treatment as well as his asthma medication. My child was on six drugs as well as shots, but he wasn't really getting any better. They didn't know what to do, so they changed his antibiotic a second time and did a series of x-rays. He looked like he felt horrible and I know he did. We were on day five of the second drug and he still felt rotten. A friend had been using transfer factor, and she told me about it. I started him out on three a day. After two days, I heard a difference in the coughing. It

wasn't as deep and didn't sound as bark-like. It wasn't echoing as deep in his chest. He was still coughing some, but it definitely helped. This got me excited since nothing else had helped so far. I doubled it up, and I started giving him six a day. I did that for a full week. I've tried to bump it up a little more, working it up to nine a day. Also, for his allergies he gets the shots once a month. Normally at the beginning of the month he has this pinky circle under his eyes. By the time he's due for a shot, they're almost black. They have a real deep purplish color. Well unfortunately, we missed this month's shot so he's actually past due. On the transfer factors he's not having the allergy problems that he was. His eyes have remained exactly as they were in the beginning of the month, just barely blushed and pinky. So we're really excited. I love the product and it has made a huge difference. My child sounds human again. It's not embarrassing to him to be out around the public. All the pollutants and the smoke and the perfume aren't choking him up and making him feel horrible." Joanie L.

16. "I was suffering with severe allergies. I was amazed that I could feel so much better after using Super Detox Formula, Immune Formula and ReZoom for just one day!" N. G. - Nevada

17. "My husband had been battling cancer for about 2 years now and his prognosis was not good. He's had cancer for several years prior to being diagnosed, and wasn't really expected to survive. He's endured two rounds of chemo, and his cancer returned in 6 months. He had to go for more chemo that was even more grueling than his first treatment and it completely devastated his immune system. He was ill all the time and continued to experience symptoms of his illness, including bleeding from the portion of the tumor that was not able to be surgically removed, as well as overall body pain and fatigue. Within 24 hour of starting enhanced transfer factors he said he felt just a dramatic increase in his energy level and a diminished body pain. And within 72 hours of taking enhanced transfer factors his bleeding had stopped. The most exciting thing of all is that his tumor has started to shrink and he has been on transfer factors only since this past August and he is now in his 11 month of being cancer free. The only set back that we have had is when we ran out of enhanced transfer factors and his bleeding started up right away again. Within 24 hours of restarting the enhanced transfer factors, the bleeding stopped and we decided that we would never be without this miracle product again. We have put our children on it. I am pregnant and taking transfer factors. My daughter's allergies have vanished and no one has had a cold or snuffle or anything since we started this. It really is a fabulous product and I encourage everyone to get on it and get your kids on it." Sharon S.

18. "I first learned of 4Life Products in April of 2004, and since then, both my mother and I have used them. I want to tell you about my mother's experience. She suffered from nasal allergies and had stomach problems. Since taking 4Life Transfer Factor Plus she seems to be educating her immune system and has a new energy level. She has also used BioGenistein Plus for help in maintaining proper hormone balance, which is necessary at her age. My mother feels happy, healthy and full of energy." — Mariel De Juan N, Florida

19. "I had asthma and extreme allergies; I was allergic to almost everything - you name it I was allergic to it. About a year ago my friend introduce me to transfer factors, and I took a couple of them a day and thought that they worked pretty well then I moved to Texas without thinking about the transfer factors again. I woke up one night with an attack, in the middle of the night, and I had the most severe pain that went all the way up my arms, across my shoulders, and down my other arm. The pain was just tremendous. I took pain medication that I had and it just did absolutely no good. I remembered when I was getting ready to move that I had just gotten the transfer factors. I thought that now would be a good time to find out just how good transfer factors are, and I started to take them. I mean I was desperate. I took them for two days and the pain started to lessen somewhat and I continued to take them four times a day and after about three days I could hold a cup of coffee without the pain. After five days, I could fix my own meals and then after about seven days I could do most of my housework except making the bed. I continued to take that amount and about nine days I could resume my normal routine. I went to the doctor after the snow melted and he told me that I had experienced a severe attack of Bursitis when I was moving but something else had also happened that I had noticed. I went through the summer, I went through last winter, and up to now I have had no allergies and no asthma, not even one attack." A. W., Texas

20. "I have suffered for several years from rheumatoid arthritis, allergies, fatigue, chronic bronchitis,

weakness in my muscles, and headaches. After being on transfer factors and enhanced transfer factors six months I have experienced a tremendous recovery. My allergies are barely noticeable, I haven't had a case of bronchitis for several months, my headaches are gone, I feel strength returning to my muscles, my rheumatoid arthritis doesn't hurt and looks a bit better, and I am full of energy. I have taken noni, ambrotose, microhydrin, MGN-3, Ag-immune, Biomune, and the list goes on. None of these products made much of a difference. When I was approached by a company distributor I was very negative about it. They offered my first bottle free until I checked it out to see if it would work. WOW! I am now a believer there is nothing like transfer factors." George Cole

21. "I just wanted to give you a little testimony. I have now been on Transfer Factor Classic for a week and it has already made a big difference in my allergies. That's the main reason I got started so I could see if Transfer Factor would help me with my allergies. I have had to take Zyrtec every day and I could not skip a day or I would pay for it the next day with bad allergy attacks. I was able to stop taking Zyrtec only 3 days after starting Transfer Factor. The last 4 days have been great. I did not expect for it to start helping me so quickly." Wesley Secrest
