 **Lourinete Buck** I'm so thankful for Reserve to come into my life... Last year I had a big break down. My hormones ware all over the place... I was on a very strong drugs for depression, hormone replacement , very low energy, bloating and lots of pain in my bones and joints... After 5 days I took Reserve I started to feel better, and I asked my doctor if I could stop talking the strong duags, and the hormone replacement. I showed him Reserve + Am / Pm and Finite and 3 weeks after I was a new woman Now I only take 2 Reserve per day... My health is absolutely amazing!!! I JEUNESSE

 **Cristina De Grave** I suffer from Myasthenia Gravis(almost matches my name  a rare chronic autoimmune disease that causes severe muscular weakness, rapid fatigue, double vision, dropping eyelids, difficulties with speech, chewing, swallowing and breathing (and I am so special, I have them all ). There is no cure. Treatment helps to relive a bit the symptoms. In september I discovered Jeunesse.. First Luminesce line than the love  of my life RESERVE. After a week I already felt a big difference, my energy level is much better,(so I'm not in my bed all day) my skin looks amazing. I'm just glowing. For me is the best product on the planet. Thank you Jeunesse!    

P. S Don't forget!!! Jeunesse does not endorse personal testimonials. Jeunesse makes no claims that this or any other product treat or cure any medical condition. Results may vary by individual. This is my own experience yours may be different.

 **Hajime Furuhashi** The most remarkable testimonial of Reserve, I have heard so far (about six months ago), is that the atrophy of the brain could be prevented. That is a unique feature of Reserve not available in other dietary supplements. I hope that Reserve will be enhanced to cure people of Alzheimer and other brain diseases.
