[Cancer] Killer Testimonies Continued from the Homepage

Stage IV Metastasized Lung Cancer -- *Gone!*

"... On March 25th, 1999, I went in for surgery (as planned), and the doctors removed a tumor from my right lung along with the top 1/3 of

my lung and three sections of my ribs...

The surgery went very well, and the doctors believed that they had successfully removed all of the cancer from my body. After my surgery, I went through an additional 12 weeks of chemotherapy from May to July, 1999, as a "safety measure." It was during this time that my body became so weak that all I could do was sleep and lie in bed all day. I lost all of my hair at this point and my fingernails and teeth became so brittle that I started to lose them as well. I lost my appetite completely and got to the point where I weighed only 88 pounds. Even as sick as I was in the summer, I was still hopeful that by fall I would get stronger after the chemotherapy was out of my system. My hope was short lived, however. In August, I found a lump under my left arm. After another surgery to remove that tumor, the tests confirmed that I had malignant lymphatic cancer (cancer of the lymph nodes) and that the cancer was all over my whole body. At that point in time, my team of doctors told me there was nothing they could do for me. I had Stage 4 (final stage) cancer and I had a maximum of 4 to 6 months to live. They told me to do everything I've always wanted to do in life within the next 45-60 days because, after that, I would be much too weak and too sick to do anything whatsoever. **By this time, I was convinced that I was going to die –**

Non-Hodgkin's (Large B Cell) Stage 3 Lymphoma

"Two days after Christmas in 2008, a chest x-ray revealed that I had a large tumor (9 cm.) the size of my fist...at which time I began to dramatically increase my Reliv shakes. On January 6th, 2009, a surgical biopsy was done and we learned that I had lymphoma, which was later classified and staged. Since an initial PET scan revealed that there was evidence of it on both sides of my diaphragm, the label they gave me was "Non-Hodgkin's (Large B Cell) Lymphoma, Stage 3"...which was not good news.

The treatment program that was recommended for me is called R-CHOP, and it is considered strong chemotherapy. R-CHOP is a combination of Rituxin along with Cytoxan, Adriamycin, Vincristine, and Prednisone, a really nasty combination of drugs. My first round of chemo was on January 22nd, and I took Reliv the entire time that I was on chemotherapy, even **during** my infusions. I mention that because it would have been very difficult for me to do that by myself; my wife would mix my shakes and hand me one about every two hours while I was receiving my treatments. We did this because we felt that I needed to get just as much good nutrition into my body as I could while I was receiving chemotherapy through my infusions. Well, that paid off, because less than three months later, on April 17, 2009, my oncologist told me that a second PET scan revealed no cancerous activity whatsoever! What had been Stage 3 Lymphoma was no longer Stage 2, or even Stage 1. My oncologist declared me to be in full remission, and I will be scanned periodically for the next 5 years just as a precaution.

especially since the doctors had never seen a person live beyond 8 months – in my condition with my kind of cancer.

At this point, I shared the devastating news with my kids, and we all took a trip to Hawaii. In my own mind, I knew that this would be my 'farewell trip.' I had given up every ounce of hope, and I had mentally prepared myself to die. It was at this time (1st week in October) that my son finally convinced me to start taking Transfer Factor™. In my mind, I was 100% convinced that it wouldn't do anything for me but, nonetheless, I started taking six Transfer Factor Plus™ and six regular Transfer Factor™ capsules every day. Within 30 days, I started to feel a little stronger and regained my appetite, but I still believed in my mind that my life was soon to be over. I kept taking the product. By January, 2000, about 90 days after starting on **Transfer Factor™**, I found myself even stronger and had gained back 7 pounds.

I continued taking **Transfer Factor™** every day. It's now been 7 months since I started taking **Transfer Factor™** (May, 2000). I've now gained a total of 26 pounds and I feel healthier than I've felt in over 2 years. I just went to see my doctor 2 weeks ago and he said that, 'I'm a living **Miracle**' and that I have no signs of cancer. **Transfer Factor™** has not only saved my life, it has given me hope for tomorrow and the years ahead."

— Dena Guidice, Metastatic Lung Cancer

Metastatic Colon Cancer

"...I live in Dodge City, Kansas, where I'm employed as a plumber and operate a small family farm. In June of 2003, I was diagnosed with colo-rectal cancer. During the surgery to remove that tumor, it was discovered that the cancer had spread and was at stage four; they found several tumors on my liver and cancer in my lymphatic system.

My first visit with the oncologist was unquestionably the most difficult day of my life. The doctor told me that the only thing he could do at that point was to treat me with chemotherapy in hopes of slowing the cancer down, but he made it very clear to me that it was only a matter of time before the side effects of those drugs would force them to stop the treatments and that there would be nothing more they could do for me. With a wife and two young daughters at home, I think the hardest thing to accept was that I would not be there for my family and live long enough to watch my girls grow up. Just a few days later, I was told about the Reliv™ nutrition and, out of desperation, I began taking the products, although my doctor strongly advised against it.

Three months after starting chemotherapy and taking my first Reliv™ shake, CT scans were done to see if there were any changes in the tumors on my liver. Amazingly, they could not find any cancer in my body. My doctor could not believe this had happened and even today, almost seven years later, he

There is no doubt in my mind that strong chemotherapy literally dissolved the malignant tumors in my body, but the problem with chemotherapy is that it destroys more than just cancer cells, it also kills things you need, things like healthy cells. Reliv helped my body create healthy cells and it allowed me to withstand the ravages of strong chemotherapy. The entire time that I was on chemotherapy, my blood work was perfect – red cell count, white cell count, platelet count, you name it. I never experienced any fatigue, no nausea, no constipation, no neuropathy, no mouth sores and, really, no pain of any kind. The whole litany of side-effects that they told me were coming my way never, ever materialized. I never missed a day of work, which was truly a blessing and, really, my only side-effect throughout my ordeal was hair loss and, of course, it has all grown back. Most people that have taken strong chemotherapy will tell you that their experience was not at all like mine.

I think what amazed my oncologist the most is that **I never missed a day of work** and, when he discharged me in May, 2009, my oncologist described my recovery as both 'dramatic and remarkable.' I credit God's grace, lots of answered prayers, and the power of patented nutrition. I refer to it as the **ultimate** hat trick!

The Reliv products do **not** cure cancer, I want to be very clear about that. But when you put the best possible nutrition into the human body – faithfully and consistently – the human body can do amazing things. It can heal – just as God designed it to do."

—Cliff Bachman, Engineer, St. Louis, Missouri

Prostate Cancer and a host of other conditions

"I had just been diagnosed and told that I had the precursor of prostate cancer. My PSA was at 13.5 and rising. My doctor wanted to be aggressive with this and I had already watched my father go through surgery, chemo, and radiation with this same disease. It was not pretty to watch as my dad had been healthy his entire life – he never got sick – and had even boxed for the Navy and had many trophies to show for it. The prostate cancer 'broke' my dad; he went from being a strong healthy man to catching everything that came by and his quality of life changed dramatically. I did not want that so, yes, I gave the presenter at the Kangen Water™ presentation I was attending my undivided attention. I sat up in my chair, followed what was being said and shown – and started drinking the water. The folks working the room kept my glass full. I noticed that night that, with all the water I had consumed, I wasn't running to the bathroom to get rid of any – that was interesting to me.

The next day I started getting Kangen Water™ from the lady who is now my mentor. I started that the last week of February, 2009. At that time I was taking medication for diabetes, acid reflux, gastritis, high blood pressure, asthma, allergies

still cannot explain why the cancer was gone so quickly and why it has never returned.

There is no doubt in my mind that through answered prayer and superior nutritional products, my body was able to not only overcome the cancer, but continues to keep it from returning.

The greatest gift of all came just a few years later when I was able to watch our oldest daughter walk across the stage and receive her high school diploma. I was there when our youngest daughter graduated from the 8th grade and entered high school. And now I have the opportunity to share this incredible sense of hope with so many people. What a gift I have been given."

— Greg Hainer, Dodge City, KS

Glioblastoma

Brain Cancer Testimony used by permission of Camelot Cancer Care, Tulsa OK.

" Jim Prescott (name changed) is a 58-year-old male, retired federal agent, living in Tennessee. He had no pertinent medical history prior to his diagnosis. Jim had complained only of blurred vision and a feeling of pressure behind his eyes, which led to his doctor ordering an MRI scan. It revealed a left posterior parietal brain lesion. He had surgery the next day; craniotomy to debulk, with subtotal resection (meaning they could not get it all). Biopsy confirmed it was a high grade, aggressive malignancy. Chemo and radiation were offered, but Jim declined and started on intravenous DMSO/Laetrile treatment at Camelot when he was 3 ½ weeks post-op. He received three 20-day rounds of IV DMSO based formula, a total of 60 consecutive days. His post treatment PET scan indicated his malignancy was resolved; there was no evidence of recurrent or residual tumor activity."

--His video testimonial, posted on Camelot's website at www.camelotcancercare.com.

Hodgkin's Lymphoma

"When I was only 27, I received the terrifying news that I had Hodgkin's Disease. I was devastated. The tumor in my chest cavity was so large that it completely filled my entire rib cage. I began on chemotherapy. At that time, my immune system was down to 2000 points. I had a friend who I knew could help me with nutrition. Mike recommended several supplements to strengthen my immune system. Then, Mike introduced me to transfer factors and I began to take 12 a day.

Much to my doctor's surprise, my immune system began to go up. In fact, it went all the way BACK up to 7200. The doctors said that they had never, ever seen anyone's immune system go UP during chemotherapy. Well, then the chemotherapy began to fry, literally fry my lungs, so they had to discontinue it. Amazingly, while off of the chemo, and on the transfer factors, my tumor continued to shrink. Again, the doctors were shocked, but I went ahead and took radiation with my immune system staying up!! Now I am taking transfer

(including one to gluten), post-traumatic stress disorder (PTSD), sinusitis, migraines – a total of 19 prescription drugs including insulin. I was taking drugs for the ailments and drugs for the side-effects. I also wore dark glasses for the inside and darker glasses for the outside due to a light sensitivity I developed during one of my Army assignments. I suffered with that sensitivity from January, 1974, until 12 days after I began drinking Kangen Water™. [in 2009]

The first change I noticed was my light sensitivity disappeared and I didn't get migraines any more. On July 27, 2009, my primary care doctor removed me from 14 of the prescriptions – including insulin. He was surprised at my numbers and wanted to know what I did. I told him the only thing I changed was the type and amount of water I drank. He was skeptical so I gave him information about Kangen Water and all he said to me was, 'Keep doing whatever you are doing.' Next, I went to my urologist/oncologist and requested another screening be done. He didn't want to do it but I asked him to humor me. He did the test and could not believe the results. One more prescription gone and today, I still have my prostate and my PSA readings are hanging around 3 and 4. YES!!! The only medications I stayed on were the four for my PTSD.

As I write this, my psychiatrist has removed me from an anxiety drug – I'm down to three now for my PTSD. I feel great and can't wait to relieve my body of the psychotropic drugs I'm still taking. ***The only thing I have changed during all this time is that I drink lots of Kangen Water™.*** It has really changed my quality of life..."

—Jay, Bellingham, WA

[update: as of Spring 2011, Jay is now free of all nineteen pharmaceutical medications]

factors and enhanced transfer factors. My tumor is completely GONE, and I am 30 years old. I have been free of cancer for over 10 months. This is not just a necessary product for everyone; it is something I will never be without.”

— Ann L., Hodgkin’s Lymphoma

“In 1996, my husband’s routine physical checkup at the VA hospital revealed a tumor in one of his lungs. The doctors wanted to perform a biopsy immediately to find out if the growth was malignant and they were already talking about radiation and chemo “therapy.” From past experience and knowledge, I knew that this was not the answer. These so-called ‘therapies’ provide no hope for real cure. Biopsies are very traumatic to the body and chemo/radiation are well known to destroy the immune system.

Instead, I immediately began to treat my husband (Chuck) with Homeopathy, raw vegetable juice, flaxseed oil, herbal formula in tincture/extract form such as the Essiac formula, the Hoxsey formula, and Cat’s Claw extract.

Since 1996, doctors have continued to monitor Chuck’s tumor with their CAT scan and PET scan. The tests revealed that a small mass still remains in his lung, but the doctors aren’t concerned about it because the tumor has completely stopped growing and Chuck experiences none of the usual symptoms associated with lung cancer. To this day he remains healthy and well.”
