Do you want smoother skin ... or improved joint health?? Well I can help .. I am now a representative for Jusuru Intl thanks to my mom. For those of you that are not familiar with this product, it is a lifeblend that you take as a dietary supplement. It helps firm your skin, decreases appearance of blemishes, lubricates your joints which makes you feel younger and more active, improves dental hygiene, and helps any inflammation that is causing havoc in your body. And if you know a little about Biology 101, inflammation is the root of all illnesses, cancers, infections etc. So.... if you are interested in learning more about this product or would like to try it, let me know. Thanks for letting me share this with you all and if you know someone that would benefit from this product please pass this along!!
