Lupus

LUPUS

I am a secondary school teacher. In year 2004 , I was diagnosed anaemic by doctor. I get tired very easily and sometimes need to be warded. In year 2005, I had a bout of very high fever and upon check up, my doctor diagnosed me with LUPUS. My ESR reading was 400. I needed to have monthly check up and my condition was not improving. I am very sad because my doctor told me that there is nothing that can be done except for taking steroid. I have tried many types of supplements but did not have any improvement. In year 2006 I was recommended Transfer Factor by one of my colleagues in my school, I started taking 3 Transfer Factor Advanced x 3 times a day. After a month, I went for my usual monthly check up and to my surprise the doctor told me that my condition has improved very much. I continued taking Transfer Factor for 5 months and I am now fully recovered and healthy. Thank you 4Life.
Zailawati, Port Dickson.

LUPUS

I introduced TF in April to my pastor's wife. She has had a red rash on her face, neck, arms, and tummy for over a year. She has tried all kinds of very expensive creams and drugs that her doctor prescribed for her. Nothing had helped the rash. She started using TF RenewAll Cream a week ago along with the Transfer Factor. She also doubled up on the Transfer Factor a couple of weeks ago. Even before she started using the TF RenewAll Cream the rash started to disappear all over her body. Today, the rash is almost completely gone.
Floris, Michigan.

LUPUS

I contracted systemic lupus at age 11 and have experienced many difficult periods over the past 13 years. In the early years it attacked my central nervous system and radical measures were required to slow the disease. I had two rounds of chemotherapy and several steroid pulse treatments. I have been taking steroids daily in varying doses all these years, but have continued to have several reoccurring episodes every year. I have taken vitamins and herbs, along with various other food and vitamin supplements. I have also tried juicing

for extended periods of time and continue to make juicing part of my diet. I have tried anything that I thought would help me control my health so I could stop taking steroids. About four months ago I felt the onset of another lupus episode. I developed a pain in my chest that hurt when I tried to breathe in deep. It felt like someone was stepping on my chest constricting my breathing. The pain continued to get worse so that I finally called my doctor, who sent me to a cardiologist. He told me I had paracartitis and that I would have to increase my prednisone. I do not like taking prednisone and I don't like increasing my dosages. When I came home from the appointment I noticed that first box of 4Life supplements had arrived that morning. I began taking them that night. I also decided that I would not increase my dosage of prednisone as much as the doctor had prescribed. The next day I felt an improvement in my breathing and the pain had lessened. For the next couple of days I continued with the 4Life™ Transfer Factor™, BioVitamins™, and the BioEFA™. I was feeling great and I reduced my prednisone to the normal amount. The next week I went in for an ultrasound to check for fluid around my heart. There was none at all; it completely disappeared. The nurse remarked, "Boy, those steroids really did their job!" I just smiled and said, "I guess so." But I was really thinking, "This 4Life™ Transfer Factor™ stuff must work, because I know it's not the steroids!" I have been taking 4Life™ Transfer Factor™ for almost 4 months and I believe it has helped me tremendously. I have more energy and am able to keep a full-time job. I still have days when I am tired and feel achy, but it seems like not as often as usual. I have struggled for 13 years trying to find things to deal with my lupus symptoms. I've taken so many different kinds of herbal products and vitamins, and have tried many different remedies. Many have worked for a while but eventually I would start to feel bad again. I have been reluctant to say much before now because all these various remedies have resulted in disappointment. I am taking this one step at a time and not getting my hopes too high, but at the same time I am feeling great and doing great. When I feel a cold or sore throat coming on (which happens frequently since my immune system is suppressed) I will take more 4Life™ Transfer Factor™ and that seems to stop it before it gets worse. I find that I still must watch what I eat and make sure that I get adequate rest to feel my absolute best. I know that 4Life™ Transfer Factor™ may not cure my lupus, but it can improve the way I feel and look at life. This has been a blessing and an answer to my prayers. I am thankful that 4Life™ Transfer Factor™ has come into my life and has made me feel better and made me happy. I've never felt better about a product in all my years of trying. It works for me!
