A HUGE thing I feel I am completely obligated to share with EVERYONE is about the Nerium EHT! Having so many friends and family in the military this one really hits home for me. I myself am on it and I don't think I will ever stop taking it. EHT is anti-aging for the brain! All of those cells in your brain that have died or been damaged...it restores them! EHT has 20 years of science behind it out of Princeton University. It is being used in Alzheimers, stroke victims, helping diabetes patients....the big one that gets me is that it's being used in people with PTSD!!! Just incredible.....if this isn't amazing then I don't know what is!
