

Pet Reviews

Liquid BioCell™ Pet is an award-winning, veterinarian-approved nutraceutical designed to meet the needs of active and senior pets. Formulated with the patented science of Liquid BioCell™ for complete joint support, healthy skin, and a shiny coat.

Here's what people are saying:

"On the last day of swim season we have a 'doggie dip' in Colorado. Here is my Liquid BioCell Pet dog, Rosie, chasing her ball again."
-Kay C.

"If you love your pets as we do, Liquid BioCell Pet is a 'must-have, must-do' for your pet!" -Eric T.

"Can life get any better? All I can say is that she's not lazying around anymore since taking Liquid BioCell Pet... Now she's jumping around and playful just like she used to be as a puppy 11 years ago!"
-Nancy H.

"I had lost my flying dog. Chewby loved to fly, but before long his hips grounded him, back to just a normal swimming boy. Then his mom snuck some Liquid BioCell Pet into his food. Now, with Liquid BioCell Pet,

he slurps up the beef flavored blend and Chewby loves to fly again!" -Diane C.

"Hi, I'm Casey Cat and my mom gives me Liquid BioCell Pet because she loves me. I was having trouble jumping and motoring around because I'm going to be 17 this year and have an old back...until I discovered Liquid BioCell Pet! Cheers to Liquid BioCell Pet!" -Cindy R.

"Hi, I'm Max this is my sister Maggie, and we love Liquid BioCell Pet. Of course girls want to be beautiful, but I wanted to run and climb my stairs again so I could protect

my family. I love the taste and in just three weeks I was doing donuts in the backyard! My Dad came home one day and said, 'What's up with Max?' Mom told him I was taking 'that stuff,' of course it was Liquid BioCell. His reply was, "Give me some." Not Liquid BioCell Pet silly, but the Liquid BioCell Life for humans! So glad I could help my dad for all the things he has done for me over the years. Try it. I know you will like it." -Cathy and Bruce B.

"For five years Rembrandt suffered from crippling joint issues in his front legs. Pills or amputation were his only options to living with this disability. Two months after taking Liquid BioCell for pets, he went from a life of discomfort and pills, being pushed in a stroller, to now, two years later, chasing our new baby poodle. His veterinarian couldn't believe the severity of his X-rays, when compared to

his present ability to be mobile. His vet is now a huge advocate of Liquid BioCell for Pets! -Theresa H.

"My 10-year old Chow mix has been suffering from sore joints and limping from a bad back hip for about two years now. She would lay around and whimper. It broke my heart. I had her on meds from the vet for awhile. She said it was bad for my dog's liver over time so I took her off of it. I was very happy when Jusuru launched Liquid BioCell Pet because I had great results with their Life Blend. She has been on it for almost two months now and she is no longer limping or whimpering and wants to play all the time. Thanks Jusuru!" -Fabien P.
