Transfer Factor Represents a New Paradigm in Nutrition and Health Care

More than 40 years in research! More than 3,000 studies!

Scientists from more than seventy nations have conducted research on transfer factors!

Hundreds of medical professionals are recommending the product

The following information has not been evaluated by the FDA or by 4Life Research. We do not claim that 4Life products directly prevent or cure any disease. We do not suggest that anyone replace traditional medical treatment with our products. 4Life products are promoted for their ability to enhance the effectiveness of our natural Immune System functions. The testimonies only represent the opinions of the individuals involved. We encourage you to use common sense to your expectations in consuming any nutritional product. Testimonies can be based on 'placebo effects' which basically means that you can experience temporary results just because you really believe you will get better. 'Placebo' results generally fade away after a short period. Keep in mind that some of these statements and testimonies come from distributors of these products and may have a conflict of interest. The accuracy of each testimony has not been verified.

Discover what some of the greatest minds in scientific and medical industry are saying about transfer factor

"Transfer Factor is the most promising breakthrough

in health care discovered in the past several decades. We are just beginning to explore all of the potential of transfer factors. Neutraceuticals like TF are the wave of the future." **Dr. Victor Tutelian, MD, MPH** In addition to earning his M.D, Ph.D. and Doctorate of Medical Science, Dr. Tutelian has also achieved the rank of a Professor and has authored more than 400 scientific publications and more than 40 federal regulations. Dr. Tutelian also received the highest recognition for a Russian scientist when he was voted into the Russian Academy of Medical Sciences (RAMS), Russia's most prestigious academy, as an Academician. He now serves as the Chief Scientific Secretary of RAMS. In this position he determines what research will be done and which projects will be government funded. Currently, Dr. Tutelian also holds the positions of Director of the RAMS Institute of Nutrition, head of the Institute's enzymology laboratory and the department of Nutrition Hygiene and Toxicology of the Moscow Sechenov Medical Academy, as well as numerous other positions on the scientific and editorial boards. Note: Dr. Tutelian receives no incentive of any kind from 4-Life Research to say this. His influence in Russia is somewhat equivalent to our FDA Director's.

"I'm a cancer physician. I primarily treat female cancer and certainly encourage my patients who are undergoing chemotherapy and radiation therapy to take transfer factor. It helps to modulate the immune system and is great for overall health. I have patients with chronic herpes infections who are taking transfer factor on a regular basis. These patients have reported a reduction in the number of outbreaks. I've also had patients with chronic yeast infections consuming transfer factor and are reporting improvement as well. Transfer factor is a science-based product with excellent data from a variety of researchers." **Duane Townsend, MD** Dr. Townsend has had more than 32 years of distinguished experience in the medical field. He pioneered a surgical technique for the treatment of pre-malignant disease of the uterine cervix. In addition, he has authored more than 90 scientific papers in peer review journals as well as over 15 chapters in research books.

"I believe transfer factor is, without a doubt, the greatest discovery of the century in supporting and modulating the immune system. I believe a strengthened immune system will be the primary way to stay well in the future. This nutrient can affect the immune system like nothing else can. I sincerely believe everyone needs to consume this product." **Rob Robertson, MD** Dr. Robertson is a former Emergency Room Physician who partnered his future with this company because of his excitement about transfer factor. He received his medical degree from the University of Louisville School of Medicine in 1974. He served as the Director of Emergency Services at Western Baptist Hospital in Paducah, KY.

"I have now completed a retrospective study comparing children in our practice with those who did not use transfer factor during the same period. Eighty-seven children, age 8 months through 9

years, used transfer factor. We found 74% less reported illness and 84% less reported use of antibiotics." **David Markowitz, M.D.** Dr. Markowitz is a pediatrician in Kennebunk, ME with a patient base of 4,500 children and has served as the Senior Pediatrician in a Private Pediatric Practice for 19 years. He received his Bachelor of Science degree from the University of Rochester in New York. He received his medical degree, general Pediatric training, and Pediatric Hematology/Oncology Fellowship from the University of Connecticut School of Medicine in Farmington, Connecticut.

"Transfer factor's are the most exciting discovery in immunology. As the 21st century unfolds, transfer factor will be one of our greatest keys to health and well being." **William Hennen, PhD** Dr. Hennen, Vice President of Research and Development at our company, is a biochemist with thirteen years of experience as a researcher in drug design and development. He also worked for eight years as a consultant and research director in the nutritional supplement industry.

"There is no other product in a nutritional substance, NOR a drug, that has this kind of power and ability to affect our immune system. With the increase of killer viruses, mutated germs, super-resistant germs, and food contaminations, our only hope and defense, must lie within our own immune system." **Darryl See, MD** Dr. See received his degree from the University of California, Irvine. Academic appointments include: Assistant/Associate Clinical Professor of Medicine: Investigator, California Collaborative Treatment Group: and Infectious Disease Consultant, Liver Transplantation Service. He has received contracts, grants, and research awards from Pfizer Pharmaceuticals, Upjohn Pharmaceuticals, Roche Molecular Systems, Harvard Biotechnology, National Institutes of Health, Department of Defense, and more.

I have seen first hand, the deadly consequences of the emergence of flesh-eating super-germs, now resistant to most of the antibiotics which were once successfully used against them. The abuse, unnecessary use and overuse of antibiotics over the years, have contributed to this life threatening development. Many infections and illnesses, including cancer, develop because of immune system failure, resulting from many day to day factors, several of which are preventable. One thing we can all do however, is to boost our immune system to help protect, defend and help our body to heal itself. I have listened to the testimonials of several healthy as well as health challenged individuals, who have used the Transfer Factors™ and other 4Life Research™ products.

Their stories and the dramatic improvement in the quality of their lives generate excitement. I believe that 4LifeTransfer Factor™ and Transfer Factor Plus™ are true immune system modulators. I have decided not only to use 4Life Research™ products, but also to tell others about them. **Magnus 'T. ibn Ale, M.D., C.M.** Magnus is a naturalized Canadian-American. He graduated with B.Sc. (Honors); and M. D.,C. from McGill University in Montreal, Quebec, Canada. After one year of general internship, Magnus did 4 years of residency in Obstetrics and Gynecology. He became a member of the Royal College of Obstetricians and Gynecologists (M.R.C.O.G.), London, England; and also a Fellow of the American College of Obstetricians and Gynecologists (F.A.C.O.G.). He has practiced his profession for some 25 years.

"Our company has proven itself to be a company that provides sound dietary supplements, in keeping with the latest research. This commitment to providing revolutionary natural products is one that I am excited to help develop. I am particularly struck with the potential that exists for the transfer factor. Transfer factor is today where vitamins and herbs were 15 years ago. What a great opportunity is in store for those who get involved now!" **Dr. Calvin McCausland.** Dr. McCausland comes to our company with 22 years of experience in the network marketing and nutritional supplement industries. During that time, he supervised the creation or reformulation of over 350 supplements. He is an internationally known lecturer and has visited 53 countries in the world. In October 1997 Dr. McCausland became the first and only American to be elected a member and academician in the Russian Academy of Medical and Technical Science. In March of 1999 he was awarded the national Kosigen award. The award recognizes the most significant contribution that will impact the future economy of Russia in the areas of science and medicine.

"Transfer factor is the most exciting product for the immune system that I've seen in my eighteen years of practicing medicine. It has literally revolutionized my practice, particularly in terms of chronic diseases."

Kenneth Singleton, MD, MPH

"Transfer factor is the gift from nature that supplies the essential tools for the regulation of our immune systems, in order to properly address the challenges we face in today's toxic world. transfer factor provides the body with an arsenal of defense, unleashing the true power of the immune system."

June Ferrari, ND, CNC

"The immunity provided by transfer factor is long lived and can help all ages who are suffering from a variety of ailments or those who want to stay well." **Richard Bennett, PhD** Dr. Bennett is an Infectious Disease Microbiologist & Immunologist, who is enjoying

retirement from a 21-year career with the University of California where he specialized in food and water quality and safety. He received his Doctorate in Comparative Pathology from the University of California, Davis. He has an extensive background in milk quality and disease control, water resource policy, food safety, public policy of natural resources, etc. He has also served as an advisor for the FDA and USDA.

"A while ago I came down with a summer cold. I got a runny nose and a sore throat, and then my next order of transfer factor arrived. I decided I would take nothing else. In a 24-hour time period I felt great! I had no symptoms. It was like I'd never had a cold. It was very exciting for me to experience that firsthand. Quite frankly, I've never had an immune boosting experience like I had with transfer factor. It's just remarkable. I think every chiropractor should know about this product and I think people should be telling their friends about this. If for no other reason you should have it in your medicine chest for when you need a immune system boost or modulation."

Dr. Gary Haagen

"The immune system is an important aspect of bringing balance to the body, and specifically, to someone who has autism. Transfer factors can be very effective because they have been shown to both boost and suppress the immune system. Because transfer factor can function as an immune system modulator, it can help to restore immune system balance in many types of clinical situations." **Kenneth Bock, MD**, best selling author on immune system modulation.

Kenneth Bock Dr. Bock is a physician who is renowned for his integrated approach to health and wellness. For the past 17 years he has integrated alternative modalities with conventional medicine into what he calls Progressive Medicine. He is the co-author of two books: The Road to Immunity and Natural Relief for your Child's Asthma. Dr. Bock recently conducted an important study on the use of Transfer Factor with children who have Autism Spectrum Disorders.

"When infants are nursed they are 17 times less likely to become seriously ill. Today we understand the science behind this dramatic display of wellness. We understand that the newborn's immune system is jump started with mom's immune history via her transfer factors. Transfer factor is our tool to jumpstart our immune systems."

Suzette Lawrence, CNM

"As a medical professional and pharmacist, I have

been exposed to a great number of medical drugs and nutrients. I am convinced that the benefits produced by transfer factor and transfer factor plus far exceed any substance that I have ever been exposed to. I have assumed the mission to take this to the world. Everyone should be on these products."

Bob Kononiuk R.Ph.

"In my 43 years of medical practice I have never come across any pharmaceutical or nutraceutical products like Transfer Factor that can help people to get well and stay well. Because my friends and relatives are getting positive responses from Transfer Factor products, I have committed myself to share Transfer Factor with everyone, everywhere. Most people don't realize that they can enhance their immune system by taking Transfer Factor products. I feel very strongly that everyone needs Transfer Factor products for their health and I encourage you to join with me on this exciting mission to reduce the sufferings of our fellow human beings."

C.K. 'Benny' Foo, MD

"Transfer factor is in the same class as the most potent vitamins. When do you need it? You need it all the time. And who needs it? Actually, everyone. Not only you as an adult, but also your children and pets. And it's safe. I have not documented one single side effect related to the use of transfer factor."

Vivienne Matalon, M.D.

"Through 4Life™, I have been very fortunate to place fibromyalgia patients on our protocol throughout North America. Transfer factors are remarkable because the recovery process has been expedited greatly. Now that we have transfer factors, we are getting even better results, especially with the more chronic stages and conditions of the syndrome. The executives and scientists behind this company and product have impeccable credentials. I consider it a tremendous honor and privilege to be a small part of this wonderful 4Life™ effort that is effectively putting lives and families back together worldwide."

Joe Elrod, Ph.D. Dr. Elrod received his Doctoral Degree in the field of Health, Physical Education, and Recreation. For fifteen years, he served as a professor at Auburn University. He has done extensive research in the field of fibromyalgia and is the author of the best-selling book *Reversing Fibromyalgia*. He has served as a member of many boards and committees, including Programs for Exceptional Children and American Alliance for Health.

"I have had diabetes for 38 of my 49 years and I've had kidney disease since 1986. In August of 1999, I went for my quarterly blood test for my kidneys. The physician called me after the test was taken and said, "Not only are your kidneys functioning well, after fourteen years, their function has improved dramatically."

My BUN (blood urea nitrogen) was near normal after fourteen years of it being almost twice as high as it should be because my kidneys weren't filtering well. The only supplemental change in my life was transfer factor. Only once in my life did I endorse a product. I've been on an insulin pump for seven years, and I've allowed my name, face, and testimony to be used nationally. This is the second time, and it took a lot to convince me. Not only are my kidneys working great, but this is the first year in sixteen years that I haven't gotten a flu shot or gotten the flu or bronchitis"

Marc H. Blatstein Marc H. Blatstein is the Former President of the Philadelphia Chapter of the Juvenile Diabetes Foundation.

Veterinary Medicine has been my profession and career for over 30 years. I became a large animal veterinarian because of my interests in the cattle industry. Horses and small animals comprised about 20% of my "James Harriet-like" practice. Then, after 4 years of doing what was most important to me, an allergy to cattle popped up. The symptoms were indigestion, intense itching and inflammation anytime I came in contact with the bovine species or tried to eat beef, even to the point of not tolerating dairy products. It was serious enough that I had to leave the practice that I loved and change directions. I returned to Colorado State University, my alma mater, and studied pathology in graduate school. I returned to practice, which at first was one hundred percent small animal. I learned not to make "never" claims because I had told my classmates "I will never spend my time working on poodles". Having recovered from the cattle allergies, I began to once again do some large animal practice. The road to recovery and healing was long-term which included digging into the literature and finding dietary and supplement applications which worked. It took about seven years to total recovery. My practice interests became more and more, disease prevention and wellness. I saw how nutrition made a great difference and was often more effective than traditional medical approaches. Then I was introduced to Transfer Factor, developed by 4-Life Research, from a colleague. I have found that the results of using these products did more in a few hours or a few days than traditional medicine alone. This became the next step for me in working in nutrition, disease prevention and wellness.

A couple of my colleagues presented these products at the American Association of Equine Practitioners meeting in Texas. There was an opportunity here, I found, not only to build a consultation type practice but also to develop some very good income. 4-Life Research is a very impressive and professional company. They developed Immune System products first for humans and then for animals. I found they were very effective and also offered an income opportunity.

But how do you go about building a network marketing business? I became acquainted with Mike Akins who introduced me to the support organization he had developed. The name of his company is Professional Networkers. I checked the website and found all the answers and help you could ever need. Professional

Networkers support system is complete; it includes everything, including a staff of over 36 people professionally trained to work with you and me. **Ken Hansen, D.V.M.**

"In October 2002 I had a C-reactive Protein test (CRP) done to measure the level of inflammation in my artery walls after having read a number of articles indicating this type of inflammation as being the root cause of heart attacks. My CRP reading was 7.9, with 8.7 being about the highest and worst one can have. This test showed I was at very high risk of having a heart attack. One physician I shared this with commented, in front of a large audience, that if my CRP reading stayed at that level, I was virtually guaranteed to have a heart attack. From the day I received my CRP test results, to this day, I have consumed 4 targeted transfer factors daily. At the end of February, 2003, I had the CRP level checked again. In just four short months of consuming targeted transfer factors, I am now close to having the BEST level one could have, 1.1. The lowest and best reading on the chart is 1.0! I believe our targeted transfer factors product most likely saved my life."

Richard Helgeland, Washington

Allergy...My 8 year-old daughter is over her allergy problems after 4 days on TF... Kevin O.

Allergies...Along with bronchitis and laryngitis attacks, I have suffered from allergies all my life. TF showed me immediate improvement during a very bad allergy season... Marilyn K.

Allergies...TF helped my allergies and stopped my snoring... Les W.

Allergies...My wife of 44 years has had all her allergies clear up since taking the TF... Ed L.

Allergies...For the past fifteen years I have suffered from chronic bronchitis, regular sinus infections, and severe allergies. I suffered from fatigue, migraine headaches, joint pain, and an overall weakening. After eight months on TF I am a new person. I feel like TF saved my life. I tried every nutrient that I could find, but only TF made the difference... Naomi Jackson, Kansas.

Allergies...I am a registered nurse, 64 years old and respect what medications can do. However, prescriptions were not helping my severe allergies or my psoriasis. Allergic episodes usually resulted in a mega-infection of bronchitis or a sinus infection. My psoriasis did not respond to either of many medications. Both of these health problems are in the auto-immune category. I included 4 capsules of Choice 50™ and 3 TF in my daily supplements. Both the allergies and psoriasis have totally disappeared. Choice 50™ and TF are a dynamic combination that have truly improved the quality of life... Doreen Lassiter

Allergies... My middle son has had terrible allergies all his life. The allergist wanted to try him on steroids. This I did not want to do. A friend finally persuaded me to try Transfer Factor to help his immune system, and I'm sure glad I did... Deb

Allergies...My son likes to show cattle. He would come in from the barn with his nose stopped up and sometimes his eyes would almost swell shut. He had been on a double dose of Transfer Factor

for about a month when he entered his steer in the county fair. After a solid week of feeding, cleaning the stall, and grooming, I don't think he even came home with the sniffles. I don't even have to remind him to take his Transfer Factor. He does that by himself. Evidently he has figured it out...

Allergy...I have to admit that I was somewhat skeptical about Transfer Factor (Plus) when I first tried the product, but let me tell you, it's truly amazing! I have been a chronic allergy sufferer all my life. Each spring and fall, allergy attacks would invariably lead to miserable sinus infections, which would mean time off from work and feeling lousy for days. It also meant going to the doctor to get prescriptions for antibiotics - yuk! Needless to say, I was desperate for anything that would help me avoid what felt like a brush fire burning in my sinuses! And the fewer doctor visits and prescriptions to fill, the better, wouldn't you agree? Transfer Factor has really fit the bill. For the past two years, I have been able to take it at the first signs of allergy, and Transfer Factor works with my immune system to help stop the attack dead in its tracks. No more sinus infections! No more prescriptions! No more bad magazines at the doctor's office! Now, I recommend Transfer Factor to all my friends and coworkers. Not only for folks with allergies, but to help get them through the cold and flu season as well. Everyone who's tried it has become a believer, too! I know that it may sound too good to be true, but Transfer Factor really works for my immune system... Carolyn

Allergy ... Although not life threatening, Mum would develop swelling and itch all over her body on consuming just one peanut. After taking TF for 3 months she has developed a better tolerance for peanuts and is now able to eat several peanuts with out having any reaction...TG/TW/Malaysia

Allergies... I've been bothered with allergies all my life and over the years I used nasal steroid sprays and allergy medications. I was still continuously sick and plagued with sinus infections. Since taking TF, Choice 50, Digestive Enzymes and Bio Vitamins, I have not had to take any antibiotics and can now eat food I previously had severe reaction to...Victoria...Or.

Allergies... Stacy who is 9 years old says: I'd been taking TF for a while because I a bug. Lots of yellow stuff came out of my nose for about two weeks. One day I came home from school and said," Mummy I can smell". For the first time I could smell things. The best smell was the flowers...Stacy...New Zealand.

AIDS... A friend of mine told me that I should have my son on transfer factors. He has AIDS, so we got him on it. First of all he wouldn't take it so I was sneaking it to him in his drinks and from his first doctor's visit until the next one his viral load went down from over 400,000 to 191,000. After he started taking it knowingly by mouth, his next blood test was down to 40,000 on his viral load. So we are very excited and hopeful and I'm just thankful for what transfer factors are doing for my son. For me, this is what I've been looking for years and I really believe in it. It's fun for me to share this with friends and I really think it's going to be the greatest! ... Connie A.

ADD...My kids baby-sit and are exposed to runny noses, viruses, etc., yet don't get sick. This gets me excited about TF and the opportunity. I have also seen results on ADD and allergy problems.... Ray M.

Acne...For five years I was on antibiotics for a severe case of acne. I still broke out about 20%. After 6 weeks on Transfer Factor™ my acne completely cleared up. My dermatologist asked me to bring him some information on whatever I was taking... Marsha S.

Asthma...With terrible asthma since age 7, I began 4Life™ Transfer Factor™ 2 1/2 weeks ago and I've gone from 20 medications & inhalers, to one pill and one inhaler... Darlene J.

Asthma...My son Ryan has asthma. He was on three inhalers per day. After 9 days on Transfer Factor, he stopped using his inhalers. We took him to the Doctor and learned that his lung function

had returned to normal. He has not touched an inhaler since July of 98... Kevin O.

Asthma ... An 8 year old girl saw such a dramatic improvement after only 2-3 weeks on TF, that later let her mum said her daughter recovered from asthma... TG/TW/ Malaysia

Asthma ... I want to tell you the wonderful news about TF and how it has gradually gotten rid of my Asthma. I can now live a healthier life than before and enjoy running around with my daughter without Asthma being so heavy on my chest... Many thanks Alex/New Zealand

Asthma... With terrible asthma since age 7, I began 4Life Transfer Factor 2 1/2 weeks ago and I've gone from 20 medications & inhalers, to one pill and one inhaler. Transfer Factor really works wonders for my immune system... Darlene

Asthma... My son Ryan has asthma. He was on three inhalers per day. After 9 days on Transfer Factor, he stopped using his inhalers. We took him to the Doctor and learned that his lung function had returned to normal. He has not touched an inhaler since July of 98. The balancing effect that Transfer Factor has on the immune system is amazing... Kevin

Asthma, allergies... I have suffered from a severe asthma and allergy condition. I used an inhaler twice a day. I was literally miserable. After taking Transfer Factor for a month to help balance my immune system, I have improved a lot. I now use the inhaler less than half as much and wake up without the swollen eyes and congestion... Justin

Asthma ... Our 10 and 6 year old, and myself, have had ongoing asthma and were on Flixotide and Ventolin. When we started taking TF we all stopped taking Flixotide - the preventative and just treated the asthma with Ventolin as required. We have all consistently improved with my 10 year old and myself only requiring the occasional Ventolin. My 6 year old still requires Ventolin twice daily, but is not as wheezy as she was, even when on Flixotide...

Asthma... My son Joshua suffers from asthma and sinusitis. He has been on Ventolin and Flexotide and has had many sleepless nights with coughing and wheezing. We were able to get him completely off the medications within a month of commencing TF 4Kids. His sinuses have been cleared. During the month of Jan I has run out of TF 4Kids and he had become asthmatic again and had to go back on his medication. As soon as I got him back on the product his asthma symptoms stopped. I highly recommend this product... Linette... New Zealand.

Asthma... I have had asthma since I was seven years old. In July I has a severe bout with bronchitis which turned into an acute asthma attack. I was put on 20 medications. After receiving my TF, I took 6/day for the first week and drastically dropped my medications. I am now taking only one medication and using one inhaler. I am totally free of steroids...

Asthma... I have suffered from a severe asthma and allergy condition. I used an inhaler twice a day. I was literally miserable. After taking Transfer Factor™ for a month, I have amazingly improved. I now use the inhaler less than half as much and wake up without the swollen eyes and congestion... Justin P.

ADD... In my family I have seen results from the transfer factors, for both an aunt with Hepatitis and my son with ADD... Julianne H.

AIDS ... Raul is from Mexico, he has Aids and was very sick. He had lost a lot of weight and was taking two different treatments. He had also tried lots of products. Sergio his up line met with him at a meeting and had not seen him for a while. He was very surprised to find out he was so sick. He told Raul about TF+ and he immediately began to take it. It has been 2 months of 6 TF+ per day and he feels great. He is now eating, has gained weight, has energy and has gone back to his normal life.

He is now taking only one treatment instead of two. He is very grateful to TF+ and Sergio for introducing him to it... Raul/Mexico

Arthritis... I am 54 years old. I am a dairy farmer and love the outdoors. Last year my joints started to stiffen and my feet started to swell. I was in terrible pain. In Feb I could not get out of my bed on my own, could not dress myself. I saw Noel Maxwell and he suggested I take TF. Within 2 weeks I was back to farming and was symptom free... Ian Cox... NZ

Arthritis...I have arthritis, and I am telling anybody that has arthritis-- please take FibroAMJ™, it's wonderful. I'm also on TF but I couldn't live without the FibroAMJ™. Bernice M.

Arthritis...I have been having pain caused by arthritis. It was gradually getting worse. Last Friday the pain was so bad that I could not fold the Sunday church bulletins. We left for North Carolina later that afternoon to visit our son and grandson. We drove straight through. I decided to double up on the Transfer Factor. Instead of taking 3 tablets a day, I started taking 6 tablets a day. I am writing this testimony on Tuesday evening (4 days after doubling up on Transfer Factor). The pain is almost completely gone. I am able to type this on my computer without any difficulty. Also, something else I discovered while we were at our son's house, I only sneezed 2 times in the 3 days we were there. Our son has 2 house cats. I am allergic to cats. Every time we have visited his house, I have several sneezing spells, I get all stuffed up and have difficulty breathing and my eyes get all red, itchy and watery. I did not have any of that happen this time. I am convinced that Transfer Factor has made the difference. Usually after an allergic reaction to the cats, I would return home and often develop a sinus infection. Not this time, however. Thanks to Transfer Factor.. Floris /Michigan

Autism... I have a 4 year old who is autistic. We began giving him TF in Nov. along with many vitamins and supplements that he was taking. He is also being treated for mercury toxicity and doing behavioral therapy. At his recent birthday party, several parents were amazed at the difference in him from a year ago. He has certainly gone from being the most sick person to the least sick person in our house. When you are not sick you can learn better. His progress with TF led me to become a distributor and everyone in our house now is on TF... Mark...NC.

Autism... Julie's son was born perfectly normal. At 18 months he had a MMR vaccination and shortly thereafter ran a dangerously high fever and developed Autism. She tried everything and finally started buying milk from nursing mothers. It helped but the supply ran out. She heard about TF from a friend and started giving it to her son along with a low sugar diet, Vitamin B6 and amino acids. He is no longer diagnosed with autism and is living a normal life again... Julie...UT

Autism... Things we noticed when we put our son who autistic on TF: Kostya (3 year old) appetite had greatly improved. He is now saying a simple few words; many do not talk until they are 5-7 years old. He is more intelligent in his playing behavior. He has stopped mouthing everything. We never noticed any improvement after sessions with the specialists. Since taking TF we have seen enough that we will not stop... Malcome and Balena... NZ

Autism...I recommended 4Life™ Transfer Factor™ to the mother of an autistic 5-year-old. She says that there is a 300% improvement over the last 2-1/2 months.

Bed Wetting... 9 year old stopped bed wetting after 1 month on TF.

Bronchitis..."I have had bronchitis for some time. I have taken two bouts of antibiotics. After one week on transfer factors the symptoms were much better. I started to come down with a cold. I loaded up on transfer factors, the next day I had no symptoms. I am very impressed with this product. The science is solid." Fred Moore

Bronchitis... "My partner Barbara and I have worked for 4 years with herbs & vitamins to restore

my health. Transfer factors have done that in less than 3 months! Over the past 4 years, I have experienced chronic bronchitis, sinus infections, and other conditions. I take every herb or vitamin I can get a hold of to build up my immune system. In the last 6 months, I have been on antibiotics 4-6 times with sinus infections. I started taking 6-9 transfer factors a day. Within 3 days I started breathing better than I had for 4 years. Transfer factors are the only thing that has been able to bring my energy level back up to where it used to be. Julie C

Brain tumor... A doctor here in France tried TF+ on a patient with brain tumor who had not spoken for a month. After 5 days on TF+ the patient is speaking... France.

Bronchitis...For the past fifteen years I have suffered from chronic bronchitis, regular sinus infections, and severe allergies. I suffered from fatigue, migraine headaches, joint pain, and an overall weakening. After eight months Transfer Factor™, I am a new person. I feel like Transfer

Bronchitis...A child in my care, with a type of muscular dystrophy had a serious bout with Bronchitis, and 72 hours on 4Life™ Transfer Factor™ cleared her breathing pathway completely.

Baby...I used 4Life™ Transfer Factor™ on a newborn with a thick upper airway, green nasal discharge, vomiting, and difficulty breathing, and he was clear within 3 days.

Baby... A newborn with a serious cold took 4Life™ Transfer Factor™ through pumped breast milk and recovered in 3 days.

Baby... My daughter, Jessica, was born on Oct 2000. From the moment we came home it was obvious there was something not quite right with her. She woke crying, fed poorly, and did stop crying until she fell asleep again. Nothing we tried seemed to make a difference. When Jessica was 5 weeks old I visited Noel Maxwell ND and was told about TF. I took some capsules home to try and the results were marvelous . Overnight Jessica was a different baby. She woke up calmly, smiled at her toys, fed better, slept longer, easier bowel movements and she was definitely a happier baby... Glenys... New Zealand.

Cancer, thyroid...I am 37 years old, and two months ago I was diagnosed with papillary thyroid cancer. The pathologist said that he was 95% sure that I had papillary thyroid cancer. Well, I didn't believe him. So he gave the results to two other pathologists on blind study who confirmed that indeed I did have cancer. I was already following a nutritional program, so on top of that I started taking one transfer factors three time a day and two enhanced transfer factors three times a day. I took those on top of my baseline nutritional program for two solid weeks before my operation. They removed the entire thyroid and they could not find any cancer whatsoever. By the way, I have the lab results saying that I had cancer, and the follow-up lab results stating that I don't have cancer. I am really happy with the results... Carlos P.

Cancer... My husband had been battling cancer for about 2 years now and his prognosis was not good. He's had cancer for several years prior to being diagnosed, and wasn't really expected to survive. He's endured two rounds of chemo, and his cancer returned in 6 months. He had to go for more chemo that was even more grueling than his first treatment and it completely devastated his immune system. He was ill all the time and continued to experience symptoms of his illness, including bleeding from the portion of the tumor that was not able to be surgically removed, as well as overall body pain and fatigue. Within 24 hour of starting enhanced transfer factors he said he felt just a dramatic increase in his energy level and a diminished body pain. And within 72 hours of taking enhanced transfer factors his bleeding had stopped. The most exciting thing of all is that his tumor has started to shrink and he has been on transfer factors only since this past August and he is now in his 11 month of being cancer free. The only set back that we have had is when we ran out of enhanced transfer factors and his bleeding started up right away again. Within 24 hours of restarting the enhanced transfer factors, the bleeding stopped and we decided that we would never be without

this miracle product again. We have put our children on it. I am pregnant and taking transfer factors. My daughter's allergies have vanished and no one has had a cold or sniffle or anything since we started this. It really is a fabulous product and I encourage everyone to get on it and get your kids on it... Sharon S.

Cancer, spots... I had a burn on my arm. I dropped a curling iron on the inside of my arm and after three days, it was so infected it had a huge red ring around it. I heard the Tuesday night conference call where somebody had applied transfer factors to a burn, so I thought I would try it. I put the transfer factors with some water and, the next day it had a little scab on it. I had two spots on my face that looked like they were pre-cancerous, they hurt to touch, one was red, one was sort of grayish brown. They'd been there about six months. Well, I put water on it, then I dotted the transfer factors on there. The next day, I didn't pay attention; I just left it on there. I don't know if it peeled off or what, but I looked in the mirror that afternoon and they weren't there anymore. I couldn't even figure out where they were. I don't know what happened to them. I had a wart on the top of my hand. I put it on. In three days, the wart was gone. I couldn't believe it. So it works really well topically... Pat T.

Cancer, Ovarian...My mother experienced a very excruciating death from an aggressive form of ovarian cancer. I was only in my early teens and she was 32 years old. Her sister died of this cancer. We have a very strong genetic tendency toward cancer. I have feared this all of my life. In December of 2000 I had a tumor 10+inches in diameter removed and immediately went on chemotherapy. Since my mother was a vitamin freak and still died, I wasn't that big on nutrition. My dad talked me into going on enhanced transfer factors. My oncologist was very impressed with how strong my immune system stayed throughout my chemotherapy. I know there is not way to scientifically prove it, but I really feel that my strengthened immune system made the difference between what happened to my mother and her sister, and myself. Now in February of 2001 I am alive and well."... Angelia Howard

Cancer... Last summer I was diagnosed with [a serious chronic condition] at the age of 74. I started on transfer factors and was able to keep my energy levels up between chemotherapy sessions. I even have had fewer cold sores. A couple of months ago, the doctor told me I had made a complete recovery from my [condition]. The doctors think it's a miracle but they believe the transfer factors may have had something to do with it. I am so thankful... Rose W

Cancer, tumor ...I took transfer factors and the tumor in my hand, which had been about the size of a dime, is down to the size of a pin head... Lori L.

Cancer, breast...I am 26 years old. A while back I found a lump in my breast. It was hard and didn't hurt. My mother had breast cancer along with two of her sisters. They did an ultra-sound test and a mammogram. I was scheduled to go in for biopsy. I started on transfer factors. When I when in for the biopsy I happened to check my chest again and there was no lump. The doctor came into the room and I told him that the lump seemed to be gone. He checked me over and then sent me back for another ultra-sound test and mammogram. No lump! I am not sure if it was the prayer, transfer factors or both but I am so relieved.... Susie Blaszcak

Cancer, breast ... I had breast cancer several years ago and it returned in the form of a tumor growing in my colon. I had surgery and had chemotherapy. In January I heard about TF+ and decided to try it. My two tumor marker tests were too high and I hoped to reduce the numbers. In January my tumor marker tests were done. The C125 test was 52 (normal is 0-35) and the C115 test was 113 (normal is 0-35). I started taking 8 TF+ a day in February and the results of the two tests in May 25, 2003 are the C125 is now at 35 and the C115 is now at 45. These tests measure the cancer cells in the blood. I am also taking Xeloda... L/California

Cancer, breast...My name is Helen and I am a breast cancer survivor. I had to pace myself with

every task I undertook. I wash my hair every day and always had to pause to rest while blowing my hair dry and I have very short hair. I went on Transfer Factor Plus™. After 11 days, I no longer needed to rest drying my hair. On the 12th day I went to a wedding. I danced most of the evening and the only thing sore were my toes due the fact that I hadn't worn high-heeled shoes for so long. Now when my partner and I take the dog out for a walk I really have to watch my pace because quite often I'll hear; "Helen slow down the dog and I can't keep up." I feel great and have energy to burn and friends now say I have a certain 'glow' about me... Helen

Cancer...My secretary has had 3 major cancer surgeries, and as a result was sleepy and run down. After 48 hours of taking 4Life™ Transfer Factor™, she is energetic and able to function again.
Manley L.

Cancer...I'm a cancer physician. I primarily treat female cancer and certainly encourage my patients who are undergoing chemotherapy and radiation therapy to take Transfer Factor™. It helps to modulate the immune system. I have patients with chronic herpes infections who are taking Transfer Factor™ on a regular basis and it's reducing the number of outbreaks. I've also had patients with chronic yeast infections, and the Transfer Factor™ has reduced their infections as well. Transfer Factor™ is a science-based product with excellent data from a variety of researchers... Duane Townsend, M.D. OB/GYN & Oncologist

Cancer...I'm a 49-year-old woman and my cancer started when I was 17 years of age. And today I can finally say thank you to God and 4Life for giving me back my life. In February of 1999, I was diagnosed with cancer once again and this time it was in my lungs. I had decided not to take chemotherapy. I had already had two bouts of it aggressively and I didn't want it any more. And I opted not to take any of the cancer drugs. Then the cancer decided to attack my bones and spine. In September, the doctors told me that my days were very limited. I had heard about Transfer Factor, and in October I had started taking it. My normal days consisted of 18 hours in bed. Walking and eating were very difficult for me. I ran high fevers constantly, with vomiting maybe 8 to 10 times a day. I had started taking Transfer Factor and Transfer Factor Plus in October. Linda Holston and Dr. Rob worked together and they said to start out on 3 Transfer Factor and 2 Transfer Factor Plus, which I did. I began to see an immediate improvement, then when we received the press release from Dr. See, regarding the increase of the NK cells, I bumped up the dosage. I became ill again and Dr. Rob said to cut back down. I went back down and decided to increase daily, which I did. November the 18th, 1999, I went to the doctor and I received a phone call that evening telling me that every x-ray and every blood count test that they took was completely normal, and there were no signs of cancer. I asked him if he was sure that it was my test and he said yes, and that everything had been tested four times by three different doctors. Today I have my life, my family and my son is going to have a mother that he is going to be able to grow up with. I thank Transfer Factor and all the doctors for everything that they have done, and I advise anyone who has any type of disease to get on Transfer Factor and Transfer Factor Plus immediately. And for children, keep them on Transfer Factor just as an extra protection with so many diseases around... Mary L.

Cancer, liver ... 4th stage (liver), had his chemo in October, after 6 courses of chemo, decided to stop, started taking TF+ (3 capsules a day for a month and increased to 9). He has put on weight and went back to work... CY/Malaysia

Cancer, liver ... Liver cancer patient in 1980, starting taking TF and could feel a change in her health. She has introduced TF+ to her cancer friends... CY/Malaysia

Cancer, uterus ... 4th stage cancer (started from uterus spread to lungs & liver), had her chemo done in September, started taking TF+ in October, and increased dosage to 12 per day in December. Her cancer cell count has come down from 500 count to 20 during her January blood test. She is much healthier now...CY/Malaysia

Cancer...Dr Vivian Matalon tells of a patient that had cancer which had metastasized to the breast, liver and brain. This woman came to her office on a stretcher and after taking TF for several weeks she is now much improved and walking...

Cancer, bladder... My granddaughter, Mary Katherine is 11 years old and was diagnosed with bladder cancer in Oct 1991. She had chemotherapy for a year. One type she took weekly, the other two she took every 3 weeks daily for 4 days. Needless to say, this took a tremendous toll on her body and immune system. When we heard about TF about 5 months ago, she started taking it. When she came back to Duke University Medical Center for her checkup in Dec 2001 her doctor and nurses were amazed at her energy and overall well being. She doesn't have to go back except for a routine check up in a year – no more dreaded tests. By the way, several of us in our family are now taking TF and TF+ as a protective measure, and guess what no colds or flu! Mary and the rest of us plan to stay on a maintenance regimen forever.... Nancy E Johnson.

Cancer, brain... Dr Steve Siagel DVM reported on a man named Frank who had a brain tumor behind his nose (a deadly kind of cancer). After 2nd cat scan the tumor had doubled in size. He started on TF+ and took his 3rd scan, it showed the tumor reduced in size. Four months later his tumor is gone and year later he is still in remission. He is now taking 4 TF+ daily.

Cancer, bone... My name is Shaylee and I am 19 years old. Last June I was diagnosed as having Ewings Sarcoma, a rare form of bone cancer. While on chemo, I met a woman who recommended TF+. I took 4TF+ twice daily and there was immediate improvement in my well being. But more importantly I was able to stop taking nausea tablets. I no longer take morphine for pain. From taking 25 tablets a day, which the oncologist prescribed I took a few TF+ and was free of pain and nausea. I now have a clearance of cancer all of which I attribute to the miracle of TF+.... Shaylee....NZ

Cancer, prostate... Dr. Rick Bennett's father in law was diagnosed with stage 3 prostate cancer. His PSA count was 2000. The cancer had spread to the bones. He is in his mid 60's. He cut out red meat and sodas, had Lukprone injections and chemo and radiation but didn't have any improvement. He had heard about TF+ and secretly taking TF and TF+ daily as a test. After 6 months his PSA dropped to 10. Then 6 months later his PSA was at one. With no sign of bone cancer... Dr Rick Bennett.. HA

Cancer, brain... Bianca gave this testimony about a friend of theirs who was diagnosed with an inoperable brain tumor. He was given a new chemo treatment that assisted in slowing down the growth of the tumor but it was still present. He started taking TF+ 4 times daily. Since taking the TF+ he has had only one bout of illness. Doctors have stopped the chemo as his cancer is stabilized and his tumor has decreased in size. He is now able to return to teaching full time....Bianca ...UT

Cancer, pancreatic... I have a patient who has pancreatic cancer and about 4 months ago he was given 3 months to live. He had been taking TF+ for 8 weeks (8 a day). He went to the Dr's to have his blood tested. After the tests the nurse came out and asked if he had had a transfusion because the nurse could not believe how good his blood looked. Does taking TF+ affect the immune system? I'd definitely say so....Mike.

Cancer, prostate... I was diagnosed with prostate cancer last fall, I started taking TF and TF+ last Dec and my last PSA reading was 0.8%. That was down from 360 in August. Clearly the oncologist was startled and pleased. I'm also on hormonal treatment. I think the two treatments potentiate each other. One of my inguinal lymph was removed last fall and proved to have been devastated by cancer. My recent cat scan indicated no problems with lymph nodes. Needless to say I will continue taking TF and TF+...

Cancer, leukemia... one of Dr. Markowitz's young patients with leukemia is in full remission and is taking TF and TF+ daily. His blood count remains good and he remains infection free since starting TF and TF+...

Cancer, breast... A patient of mine came to see me with breast cancer. It had been diagnosed 5 years ago. She had chosen not to do traditional therapy but to treat it herself. By the time she came to see me it was inoperable and the tumor was the size of a grapefruit. There was an ulcerated sore 4 inches in diameter and 2 inches deep. It was black inside and smelled horrible. I immediately opened 6 TF capsules and sprinkled them on the wound. I told her to get organic cabbage leaves, crushed them and used them as poultice. I also asked her to take 9 capsules of TF+ a day. After 6 weeks the wound was all healthy pink tissue. The patient is now having a skin graft to close the wound and tests show no cancer cells in the breast or lymph nodes... N Maxwell ND..NZ

Cancer, prostate... In 1998 I found out that I had prostate cancer. I was told that my cancer was not operable and that I would need to take shots for the rest of my life. I chose not to do what the doctors recommended. I tried all kinds of alternative medicines over the next few years. Last year everything went downhill for me. I was paralyzed from the waist down. The doctors decided to perform surgery on my prostate to stop the hormonal feeding of the tumors on my spine and the lesions in my lungs. After surgery I was on medication for pain when a friend told me about TF+. After trying this supplement for several days I found I no longer needed the pain medication and stopped taking it. Today the tumors are gone from my spine and lungs are clear. I now take 4TF+ a day and took 9TF+ a day for several months...Max...NC

Cancer, multiple myeloma... I have Multiple myeloma and decided to try TF+. After 7 weeks on the product I had blood tests done. The results of blood work were very good. All the counts were up. I used to be on a runner and am now back to running 3 miles a day... Murray... MT

Cancer, skin... I had a small cancer on my left temple that is gone. I have been using TF Renewal in addition to regular TF. There is no doubt in my mind that the addition of TF Renewal is responsible for this... Jan .. KA

Cancer, breast... July 1999 I was involved in a car accident and in the resulting bruising on the right side, I discovered a lump in my right breast. It turned out to be breast cancer. I chose to have the lump removed by surgery. I then visited Noel Maxwell about changing my lifestyle and rebuilding my body's immune system. I have been on TF+ for a year and have now been cleared by the breast cancer clinic... Robyne... NZ

Cancer, lymphoma... I have an uncle who was hospitalized at Cornell Medical Center with lymphoma. He was sent home in Jan 2000 because they had nothing further to offer him. His white blood count was 150. The normal was between 4,000 and 10,000. The uncle's son is an MD and did not want anything to do with TF for his father. However my uncle did start taking TF and within 2 weeks his WBC was at 4,000. The MD is now looking for natural approached for illness. The uncle continues to improve and takes 2TF daily and 1TF+ daily... RHEA.

Cancer, throat...I have suffered from cancer in my throat. The last time I visited my radiologist he exclaimed "What have you been doing for your throat, it looks wonderful. I am so thankful for enhanced transfer factors. I believe it is a lifesaver... James McDonald

Cancer, liver... I started Chemotherapy Oct 2, 2001, once a week for duration of an estimated 4 months therapy. I finished early with what I sincerely believe to be the help of TF+. I took one 3 times daily for a week, then two 3 times daily until the 3rd month. The remission seemed to be going so well that I boosted the dose to five 3 times a day with green tea (a known cancer fighter) and declared war on the tumor in my liver. The tumor is now completely gone with only lingering affects of chemotherapy. The condition of the liver from the first C-scan to the last showed a dramatic difference. The area of the liver affected the first time seemed to be completely repaired. I will continue to take TF as a preventive and maintain a dose of one 2 times daily... William J... NC

Cystic fibrosis... My granddaughter, diagnosed with cystic fibrosis at 11 months of age, had trouble

gaining weight and was vomiting and coughing. After 3 months on transfer factors, she's gaining weight, has energy, and is down to an occasional dry cough... Keith M.

Cystic fibrosis... We have a teenager with cystic fibrosis who started taking TF+ 6 months ago and has had no infections since then. She previously had a history of a minimum of 1 infection monthly requiring antibiotics. If I had a child with CF, he would be on both TF and TF+ daily for the rest of his life. I am heartbroken over how many previous CF patients I have over the years who could have benefited from these products.... Dr David M

Cyst... I have had a problem which was never diagnosed by my medical doctors (it seems to be in the head -culture negative and loads of antibiotics). My signs were consistent with interstitial cystitis. I experience unrelenting pain for days, and a very depressing life style for over 9 years. I started with enhanced transfer factors at 2 - 3 times daily and after about 10 - 14 days, went to maintenance dose, and whenever signs recurred a tingle - I took more. I only had 3 - 4 recurrences of signs which never developed, and this had never happened prior to taking enhanced transfer factors at any time. I have been 2 months sign-free, the longest I have ever been without signs. I am one of the successes of enhanced transfer factors . I am very pleased and grateful pleased to have quality of life back... Annie

Crohn's Disease... I have suffered the pain and helplessness of Crohn's Disease since 1976. Over the years, I have searched everywhere for relief and information, with the help of my husband and family. In 1986 & 1990 I had bowel resections, with no medical insurance. I have taken part in two clinical trials, at Cedars Sinai Med. Center, in Beverly Hills, Ca., within the last five years and the travel and expense has taken a toll on our finances. I have tried it all from Ozone to Remicade, with only short term relief or no help at all. In October of 2000 I was told I have kidney disease (IgAN), which is also an auto-immune condition. This doctor told me the exact same thing I was told for the Crohn's, " We don't know what causes this, don't know how to cure it and advise mega doses of steroids. "At this point I knew I needed something to boost and modulate my immune system, as my body could not stand more Prednisone. A few days later my husbands' good friend told us about TRANSFER FACTOR and I knew it was an answer to my prayers. I began taking 6 Transfer Factor and 4 BioEFA per day on January 9th, 2001 and within two weeks my husband and I noticed a remarkable improvement in my energy, I have no more pain and life is fun again. All this with no horrible side effects of steroids or antibiotics. I am getting my life back, after 25 years, and no words can express my joy and happiness... Linda S.

Crohn's disease... I was diagnosed with Crohn's disease in 1991. Throughout the past several years I have suffered from constant pain in my abdomen along with irritability and other symptoms of Crohn's disease. Crohn's disease being an inflammatory bowel disease also causes malnutrition. Along with the Crohn's, I was diagnosed with Epstein Barr virus also known as chronic fatigue. I had to take several naps during the day just to be able to regain my energy to perform little tasks. I chose not to take the drugs that were prescribed to me. I looked towards alternative forms of treatment. Over the years I have tried many forms of therapy and supplements to help fight the Crohn's. I even went to a hospital in Tijuana, Mexico to try some new alternative treatment. The most relief that I would have would last for a few weeks. I'm 6'2" tall and my weight was down to 167 lb. I just learned to live with it. In September of 1998 I learned about 4 Life Research and Transfer Factor™. After taking Transfer Factor™ for a month I started to notice that I was sleeping through the night without any pain or irritability. Then I noticed that I could eat foods that I had stayed away from due to the pain they would cause. My energy level was lasting longer throughout the day and I wouldn't have to take naps. It has now been five months since I started on Transfer Factor™ along with the Bio-EFA (essential fatty acids) and I have had absolutely no symptoms of the Crohn's disease. My weight is now 187 lb. and I feel great. The best part is I now enjoy eating healthy foods that I couldn't eat before... Dave D.

Crohns Disease... A 51 year old man with Crohns disease and no spleen. Had been ill for many

years. He had tried many different nutritional products with none of them really helping. After he started on TF he state he has never felt better. Always ill with something he has not had a cold of flu since taking TF. He now has appetite and is gaining weight....C...MI

Crohn's Disease... My name is Michael, I'm 22 years old, and I'm from Enfield, Connecticut (USA). I was diagnosed with Crohn's Disease on May 1st of 2000. I had been to numerous doctors throughout my life, with complaints of horrendous symptoms: only to be told it was all in my head. It usually felt as if I was being stabbed constantly around the lower right section of my abdomen. I had seen 16 doctors in total; ranging from General Practitioners, GI specialists, and Endocrinologists. I believe I had the disease for well over 10 years (Since age 12 or earlier). In the 10 years I went searching for answers I was misdiagnosed with everything from Anorexia, Manic Depression, ADHD, Severe Depression, and just random social anxiety. This year I had actually begun losing a lot of weight. Every week that passed between Christmas 1999 - May of 2000- I noticed about 5-10lbs being lost. I was 205lbs in December and shrunk down to a meager 125lbs in 4 months. I remember waking up one afternoon to go to work, and seeing myself in the mirror as I passed it to get in the shower. I realized that the person I saw in the mirror wasn't recognizable. It was at this point I became scared. I began researching online, calling doctors, and searching for answers. Eventually I was no longer capable of walking. I became so weak that I would go into shock if I even attempted to get out of bed. I decided that if the doctors wouldn't allow me to come to them, then I would force them to see me, by being carried into the ER. At the ER they ran general tests, (Blood pressure, checked eyes, ears, nose, mouth, and took a urine sample) and found "get this!" *Nothing wrong*. I asked if an Upper GI could be done or perhaps some general blood testing for anemia, because it was suggested that Crohn's Disease may be the cause by a close friend. They "shrugged" and said they didn't have time, or someone available to run the tests. Can you imagine the nerve of someone telling me in the Emergency Room that they didn't have a person available to run an Upper GI or general blood test? I became infuriated, and more upset. As I was leaving the hospital via wheel chair I asked the nurse if she could get me a large trash bag. She then immediately asked; "why do you need such a large bag?" I then responded saying; "I have to have something large enough to carry all my symptoms, and suffering out through this door." She then gave me a disapproving look, and I got even more bitter. Eventually I was diagnosed correctly. Conventional medications (Prednisone, Methotrexate, Imuran, Asacol, and Remicade were all failures for me). They allowed me to survive, but the quality of my life was severely limited. I was still too weak to leave my house, and the side effects of these conventional treatments left my body withered, and fatigued. After 6 months of research, and scrutinizing through subject matter related to immunology, bio-chemistry, and differing theories on the causation of Crohn's Disease I was introduced to a product called Transfer Factor Plus by a woman named Bonnie. The research I had been doing on Mycobacterium Paratuberculosis (theorized bacterium trigger/cause of Crohn's Disease, and Johne's Disease) correlated directly with the product, and contained exactly what was necessary for me to overcome the infection. It was at this point that I had to implement the treatment, and see if the expected results would in fact ring through. I have been on Transfer Factor Plus, and 4Life's Essential Fatty Acids (EFA's) for 3 weeks, and I am doing "wonderful". All symptoms related to the disorder have vanished, and I continue to take 9 Transfer Factor capsules per day, and 4 EFA capsules daily! As my body heals from the damage done by the illness I'll take this time to build a business at home being a distributor of 4Life, and it's innovative products. I'll advocate the use of 4Life's products for those who continue to suffer with these silent conditions. That is in fact what Inflammatory Bowel Diseases are *The silent diseases* We who suffer with these diseases put on such great facades to cover our shame, and embarrassment, all the while going home at night to clench our pillows against our abdomens, and cry ourselves to sleep. You no longer have to suffer alone, and there is a treatment regimen available to end your debilitation.

Colds...In July I acquired what I assumed was a common cold. Two days later my cold had become severe. I started taking TF+ at the rate of 3 capsules every 2 hours and proceeded with my activities. By afternoon I was feeling much better and my evening my symptoms were gone so I stopped taking TF+. The next morning the symptoms were back so I continued taking TF+ for two more

days. I haven't been sick since and would not be without the product. I consider TF+ a doctor visit and prescription in a bottle... Jack NC

Cold Sores...Recently I have had two bouts with cold sores that I have been afflicted with all of my life. The first of the last two incidents I was given some Transfer Factor and was told that others had seen good results with dabbing some on their cold sores. I will try anything to get rid of these painful sores. I did open a capsule and applied some of the powder to the sore. The powder doesn't stick very well so I actually did this about three times before going to bed. The next morning I was pretty impressed that the sore had not grown any bigger and actually was already starting to decrease and heal. About six weeks later another sore started. Again I applied some of the powder out of a Transfer Factor capsule. To my amazement the next morning the sore was itching (a sign of healing). Two sores, two successes. If a cream is ever made for just this reason I will be first in line to buy some! ... Patty Westover

Colds...I'm very, very excited about Transfer Factor. My family has been using it every day for over two months and I can tell you we feel a difference already. My son who's only two years old gets colds which usually go right to his ears. Since I began giving him Transfer Factor, he hasn't had a cold or an earache! This product really helps build up his immune system... Teri

Cold... I had ignored a cold for over 2 months and it was getting worse and worse. I was totally exhausted and for me, that is not a normal way of life. I was introduced to transfer factors. Within 3 days, I felt like a new woman. I was up and moving again. I have loved it. I would recommend it to anyone... Billie T.

Colds..."4Life™ Transfer Factor™ knocked out my summer cold within 24 hours... Dr. Gary H.

Cough, congestion...I have a granddaughter that's fifteen months old. She's been sick for about three months with a cough and a lot of congestion. She has had stomach flu off and on. We've tried everything. We've taken her to the doctors without success. We finally gave her transfer factors, and within a week she was better... Patricia Tavish

Disc disease... After a third surgery, I have degenerative disc disease, I found transfer factors. After 3 days I could turn my head, and touch my toes... Mark F.

Diabetes...I have had diabetes for 38 of my 49 years and I've had kidney disease since 1986. In August of 1999, I went for my quarterly blood test for my kidneys. The physician called me after the test was taken and said, 'Not only are your kidneys functioning well, after fourteen years, their function has improved dramatically.' My BUN (blood urea nitrogen) was near normal after fourteen years of it being almost twice as high as it should be because my kidneys weren't filtering well. The only supplemental change in my life was Transfer Factor. Only once in my life did I endorse a product. I've been on an insulin pump for seven years, and I've allowed my name, face, and testimony to be used nationally. This is the second time, and it took a lot to convince me. Not only did it reverse my kidney disease, but this is the first year in sixteen years that I haven't gotten a flu shot or gotten the flu or bronchitis." Marc H. Blatstein Former President of the Juvenile Diabetes Foundation; Philadelphia Chapter

Diabetes...My husband Nelson was diagnosed with diabetes in January of this year. When Nelson went to the doctor his blood sugar count was 450 within 3 months we had it back down to 110. The doctors office even called our house in astonishment about how quickly things had gotten back to normal. Especially since in monitoring Nelson every week the doctor was concerned that the medication he had given Nelson was not working properly. That is when we added transfer factors. Within 3 days Nelsons levels started to drop. Also with diabetes comes certain skin disease, one of which is psoriasis. Nelson has had it very severely on his head, that he was embarrassed when he

was out due to flakes or getting his hair cut because it looked so awful. It would itch so badly that in his sleep he would scratch his head to the point of bleeding. Then 4-Life came out with TF Spray with colloidal silver. We started spraying that on his head every night. Not only has the severe itching gone away but his head is clearing up and the psoriasis is going away. We are both very grateful to this company for the products they have come out with that help us have a much better quality of life... Mickey B

Diabetes, Type 2... My father, who has Type 2 diabetes, on insulin has been on TF+ for 30 days now. His blood sugar levels have dropped to the point that he has (for the second day now) eliminated his insulin shots and his blood sugar levels have remained consistent (about 150 or so) Hooray! He is so excited! My mother in law, who is Type 2 also, but not on insulin experienced a rapid decrease in her blood sugar levels after 1 day on TF+. After 4 days she was down as low as 99. She ran out of TF+, and went without for 5 days, and her sugar levels went back up to low 200's. She is also very excited at the results! 2 down and 4 more Diabetics (in the family) to go! ... Mellisa

Diabetes... I was admitted to Tenet Parkview Hospital on April 12, 2001, with a diagnosis of diabetic Charcot neuroarthropathy. Both of my ankles had undergone a crippling disease process. I had numerous bony deformities, and was given the option of amputation, but elected to have extensive reconstructive procedures performed on both of my ankles. Being an insulin-dependent diabetic for greater than 45 years, I was thought to be at risk for delayed healing and infection. I was taking enhanced transfer factors and had no previous problem with infection or poor wound healing. I required numerous fusions with internal fixation to stable my feet in neutral position. This was performed in order to allow me the ability to walk. At the time of my first post-operative cast change in 10 days, I showed no signs of wound infection or wound dehiscence. I exhibited mild swelling only. Serial radiographs were taken and revealed fusion of my ankle joints in just seven weeks. This is considered excellent for a "normal" patient, who is not diabetic! All of my fusion sites and incisions healed beautifully without any wound or bony complications. I was extremely surprised by my ability to heal. I believe that it was the enhanced transfer factors that gave my body the ability to heal in a "normal fashion." I was hospitalized until July 27, 2001, at which time I was discharged back to my home in California. I ambulated out of the hospital on my own power and my limbs were saved... Nancy Lyons

Diabetes... Mrs Lyons was admitted to the hospital Apr 2001 with diabetic Charcot Neuroarthropathy. Both ankles were affected with numerous bony deformities. She was given the option of amputation but elected to have extensive reconstructive surgery. Being an insulin dependent diabetic she was at risk for delayed healing and infection. Mrs Lyon told me she was taking TF+. Previously she had had a problem with infection and poor wound healing. After surgery Mrs. Lyon showed no signs of infection and only mild swelling. All her fusions sites healed beautifully without complications. I was extremely surprised by Mrs. Lyons' ability to heal. I consider this a mild miracle but Mrs. Lyons insists it was TF+.... Larry Goss, DPM.FACFAS...PA

Diabetes, juvenile... I have a patient with juvenile diabetes who has done very well with TF. She takes twice the recommended dose and built up to that level slowly watching her blood sugar levels carefully. She had reduced her insulin by 60 to 70 % since starting TF one year ago. She also has had on infections which led to much better control of her blood sugars... David M MD...ME

Diabetes ulcers... diabetic ulcer on foot for 14 years, foot purple, tight bandage, cleaned every 2nd day . Introduce TF+ and TF renewal. TF+ 4 a day and TF Renewal topically. New tissue has grown over the hole in the foot and he can walk. Foot is no longer purple. The response has taken 5 months. He is a walking miracle.

Diabetes... Mark's cousin has had diabetes fro 62 years. Her foot doctor who is an advocate of TF had her call me and get TF. They thought she was going to lose a foot so she mega-dosed on TF fro 2 weeks. She has lost only a toe not the entire foot.

Diabetes... Glen is a diabetic and states that he has been taking insulin for 55 years. He would take 2-3 insulin injections a day. 8-10 months ago he started having problems in the muscles in his legs. The pain gradually worsened and he used a cane and then a wheelchair. The paramedics were at his home once or twice a week to help because of insulin reactions. He started using TF+ and no longer uses the wheelchair or the cane and the medic visits have stopped. He states that this is the best that he has ever felt and is amazed at the loving kindness and help from everyone...

Diverticular disease... Bill has diverticulosis that quite often becomes infected and turns into diverticulitis. Since being on TF he has had no problems... Bonnie H... SC

Diabetes ... Mary Ann age 45 has diabetes and is now taking 500mg of Glucophage. She had cancer 3 years ago and is taking Tamoxifen. Mary Ann developed blisters and then ulcers on her foot 11/2 years ago. She was treated by the doctor with several different antibiotics but the wounds did not heal. After several months she was referred to the wound centre. She has been going there three times a week and they have taught her how to clean the wounds at home to help stop infection. When infection does occur they must scrape or cut away tissue and clean out the infection. At that time Mary Ann decided to try Transfer Factor. She took 8 capsules a day and sprinkled TF in the wounds. Five days after starting on TF she went to the wound centre and they thought they detected an infection in one of the wounds. So she went to the hospital and they cut tissue away and when they got to what they thought was an infection pocket it was just water. In just 16 days two of the wounds were almost healed and the third (the one she had surgery on was filling in with healthy pink flesh)... Mary Ann/Texas

Diabetes, ulcers ... Diabetic ulcer on foot for 14 years, foot purple, tight bandage, cleaned every 2nd day. Introduced TF+ and TF renewal. TF+ 4 a day and TF Renewal topically. New tissue has grown over the hole in the foot and he can walk. Foot is no longer purple, This response has taken 5 months. He is a walking miracle. Deborah (Immunologist)/Australia

Epstein Barr virus... I was diagnosed with Epstein Barr ten years ago. During the following years, I experienced indescribable fatigue, self doubt, increasing pain and depression. It hurt to do everything. By the time I was married I had learned to work around pain. After the birth of my son my symptoms intensified. For the following years I trudged along until I began losing feeling in my hands and one of my legs. It was at this time that I was introduced to TF. I made a few simple dietary changes and began to take TF as well as the Fibromyalgia protocol. Within six weeks I was not only making dinner and cleaning but was feeling much better. Now I am pain free, well rested, energetic and most importantly, I am living again... Michelle...NJ

Eczema... My 6-year-old son has had terrible eczema all his life, yet 4Life™ Transfer Factor™, in just 2 months, has made significant improvements." Anthony V.

Fatigue and headache ... A lady in her 40's has been having these problems a long time. Took TF and after a week, the headache got better. It's almost 2 months now and she's feeling so much better. She continues to take TF and has introduced it to her mum... TG/TW/Malaysia

Female balance... FemPro™ is a unique female balancing cream that contains a super-rich blend of natural progesterone (from soy) and diosgenin (from wild yam). FemPro™ is naturally metabolized and utilized by the body with no harmful health risks whatsoever... Dr. William Hennen.

Flu ... Our daughter, Eileen, suffered her first flu-infection in 11 months, May 9, 2003. Started with a sore throat in the morning. Then coughing, runny-nose, vomiting and wheezing. Saturday morning visited doctor, who said it was caused by a rare new cross-breed of new mutant virus & bacteria. She was prescribed with the antibiotic called Erythromycin. We chose to try TF first. We gave her 3 TF every 4 hours and 1 TF+ morning and night. Again another horrible Saturday night and we had

to use asthma machine to ease her breathing. By Sunday morning she was happy chirpy and singing away, and playing her recorder/flute! Amazing recovery... Henry/New Zealand

Flu...My flu was gone after 20 TF capsules and 10 hours... Linda B.

Flu...My granddaughter is 2 and she had the flu virus. She was on four different kinds of antibiotics for 4 months and she was not getting better. I started her on three TF in the morning and three at night. The next morning the sniffles had started to go away, and within 4 or 5 days she was completely cleared up. My husband and I have also had wonderful success with allergies... Sue H.

Food Poisoning...While traveling in Detroit, three co-workers and I ate contaminated food. The three men became seriously ill for two days, while I only experienced a mild stomachache. I was on Transfer Factor™... J. Stover.

Fibromyalgia... had taken over my life for approximately 15 years. Then I found out I had become extremely toxic to the medications, so I had to stop taking all prescription medications. Then I received a call about Transfer Factor™ and after a lot of research I decided to give it a try. In less than 4 weeks I could sleep through the night and I could exercise with a lot less pain. My checkups have been symptom free. I had forgotten how good it feels to feel good again. Thanks 4Life for giving me my life back... Fibro Free, Pam - Wisconsin

Fibromyalgia ... I was diagnosed with Fibromyalgia about 3 years ago and realized that I've had it for many years. I've been taking the FibroAMJ™ Day-Time and Night-time formulas since May of 1998. I am a totally new person. I'm back on my 5 mile walks again, and I can golf 18 holes and do my housecleaning. I also started on the BioVitaMins™ a couple months later. I'm not as tired and I'm starting to have a lot more energy. I think it's a wonderful program. I am very happy with what it's going for me. I can live again. .. Dianne A.

Fibromyalgia...I suffered from the symptoms of Fibromyalgia, arthritis, and chronic fatigue syndrome. I have tried other nutrients with a degree of success. After consuming Transfer Factor™, FibroAMJ™, and BioVitaMins™ for a couple of months, my symptoms decreased by at least 50%. Now, after six months, I am virtually symptom free... Kay B.

Fibromyalgia... I have Fibromyalgia. Since I've been taking the FibroAMJ™, I've been sleeping a lot better. It also helps to alleviate the pain; and so I am just really impressed with this. The more I learn about this product, the better I like it... Yvonne K.

Fibromyalgia ...I am a young woman with Fibromyalgia, with symptoms like migraines, muscle aches and exhaustion, and I started on the 4Life™ Transfer Factor™ and FibroAMJ™ system and am able to get out of bed and do the activities of daily life... Kelly Z.

Fatigue...My symptoms associated with Lupus, being sick constantly and feeling exhausted, have gone away. I feel energetic since using 4Life™ Transfer Factor™... Linda M.

Fatigue syndrome..."4Life™ Transfer Factor™ helped me to get over the Epstein Barr virus and mononucleosis, which can cause chronic fatigue syndrome, after only a couple of weeks... Sue H.

Fibroid Tumor... A woman had fibroid tumors in her lungs not malignant and an antibiotic resistant staff infection. Seriously ill. She started on 6TF+ a day and made an amazing recovery... Bonnie P ... NC

Fibrocystic Condition... I was diagnosed at the age of 28 with a fibrocystic condition. My ovaries and uterus were covered with cysts and fibrous tissue. My uterus was enlarged. Also with this condition I had tremendous pain during menstrual cycles. I started taking TF 6 months ago. When I returned to the doctor for a check up he found my uterus normal and the cyst were gone from my

ovaries... Jewel... SC

Fibromyalgia... I have seen 4Life™ Transfer Factor™ knock out colds, sore throats, etc., but it also has helped Fibromyalgia, neurological problems, chronic yeast infections. All of our cancer patients are using 4Life™ Transfer Factor™... Duane Townsend M.D.

Fungus... "Back in the '70s and 80's I was a serious marathoner. In preparing for the race on marathon day it was customary to rub copious amounts of Vaseline on my feet and toes to minimize the blisters which inevitably occur. About ten years ago I developed a serious fungus in my toe-nails. Nothing would help it. After one month on transfer factors, my once thick toe-nails are reduced in thickness by at least one half. Is there no end to what transfer factors can accomplish? ... Charles Kowalski

Flu... The Transfer Factor Plus has helped our immune system keep us well. I got the flu and thought I wanted to die. Ten hours and 10 capsules later and I was fine. The immune system is an amazing thing when it is working right... Linda

Flu virus... My granddaughter is 2 and she had the flu virus. She was on four different kinds of antibiotics for 4 months and she was not getting better. So I gave her three transfer factors in the morning and three transfer factors at night. The next morning the sniffles had started to go away and within 4 or 5 days her symptoms completely cleared up. My husband and I have also had wonderful success with allergies... Sue

Fungal condition... I had been suffering from a recurring fungal condition on my neck and shoulders. My doctor prescribed an anti-fungal drug, which made the problem disappear temporarily. However every two or three months the condition would flare up again and I would have to go back to the doctor for another prescription. I started taking transfer factors in July of last year. The condition has gone away completely and has not returned in over 9 months. There's no question this outstanding product works! ... Ron Santoro

Fever... I am so thankful for transfer factors. My little boy has suffered from a fever from unknown origins for several years. He was given ever known medical test and the cause could not be found. He would get colds that would last for weeks or even months. I put him on transfer factors for two days and the fever left. The only time he has had a fever since then was when we ran out of transfer factors. He does not stay sick for long periods with a cold any more. He will get a cold once and a while but in a couple days it is gone. This product has changed our lives in a very special way... Kevin Donaldson

Gout ... T.L. has Gout. He is doing well. His blood test for the last 6 months had shown normal uric acid level since taking TF+. His uric acid is always on the high side. He did not change his diet. TL/Malaysia

Gum ... I have a serious gum problem, periodontal disease. I have been seeing st for sometime. I began consuming transfer factors sometime ago. The last was in to see the dentist, he asked me what I was doing to my gums. I king. He said some how they had cleared up. I was listening to the veterinarian testimony on how periodontal disease is the number one killer of animals and how transfer factors were helping their immune systems. Then it dawned on me what had happened to my diseased gums. We have one great product... Guy Sinclair

Huntington's... I am a health caregiver. I take care of a Huntington's patient who has fought colds and flues every season for the past the eight years. Since I have placed her on Transfer Factor she hasn't experienced a serious cold or flu. The difference is like night and day. This is a great immune product... B. Whitmore

Hepatitis C... Kim is a 37 year old father of 4 children with advanced Hepatitis C, facing a long and

expensive therapy with Interferon, a therapy fraught with many side effects. Kim decided to give the immune boosting capabilities of TF and TF+ a chance to aid his own body's abilities to fight off viral infection, before he started this Interferon. Although his results are still preliminary and very early, thus far Kim has had very encouraging results. After 4-5 months of fairly consistent use of TF and TF+, Kim's liver function tests have improved dramatically and at times are within normal limits. He FEELS so much better and the complicating factors of gastro-esophageal reflux (acid reflux) and constipation are now totally resolved. He has voluntarily stopped all of his reflux and bowel medications. His energy levels have increased and remain high, as long as he takes his immune boosters regularly. He too looks forward to sharing this experience with others with Hep C and the physicians who treat these challenged people. We wish Kim well in his goals of healing himself and others with 4LR... David Markowitz MD.. Me

Hepatitis C... Simon has Hepatitis C and started taking TF in April. He had his periodic examination at a veteran's hospital before starting on TF. On August 10th he had another exam at the VA hospital and his BP was normal and his liver count was down to 60. Needless to day his doctor was amazed and asked what he was doing. Simon told him the only thing was doing different as TF... Patti B

Hepatitis B shot... A 6 month old baby girl has a Hepatitis B shot and suffered a bad reaction. She promptly got a cold and sinus congestion and would not sleep She started on TF one day and then increased to twice a day and within one week she was much improved...C ID

Hot flushes... Fro three years I have suffered from fatigue, anxiety, night sweats, heart palpitations, hot flushes and insomnia. I really felt wiped out. I made several visits to doctors and tried several prescriptions but nothing seemed to work. Someone suggested I go see a naturopath. I did improve on his program but when I started taking BIO Genstein I noticed am immediate change in the way I felt. I would strongly recommend BIO Genstein... Heather ... NZ

HIV/AIDS... Feroza is 26 years old. She came to Nkosi Haven in Dec 1999. She was very thin and frail. She needed assistance in walking, bathing and eating. Her hearing was bad, memory very bad, eyesight fair and body strength at only 17%. For a number of times, Feroza has been admitted to the hospital and her health was deteriorating. She was also pregnant. Weighed only 28Kg. Her CD4 count was 43. After 3 months on TF+ her CD4 went up to 78 and her weight to 52kg. Now her CD4 count is 163, her weight is 55kg and she is able to take care of herself and her son. For a woman whom we have said goodbye to 7 times and 7 times she has bounced back and is very healthy and seldom sick except with occasional bout of diarrhea....South Africa.

HIV/AIDS... Cynthia is 27 years old. She was so weak when she arrived at the haven that she could not even lift her baby. She also couldn't do simple task of mopping the floor. She weighed 44kg, Two weeks late she was put on TF+. Two weeks later there weight was up 7kg. Because of her cough and not being able to gain any strength, TB test was done which came back positive and was put on a TB treatment along with TF+. Her CD4 count on arrival was 297 it is now 340 and her weight is now 63kg. Her body strength has returned. Her eyesight is good, as is her memory, and she is able to take care of herself and her baby. Gail Johnson... South Africa.

HIV/AIDS... Grace is 42 years old. She well an d full of energy when she came to Nkosis Haven in July of 2000. Her CD4 count was 388 and her weight was 59 kg. Her memory was poor, since being on TF+ her memory is normal and her strength is at 110%.She works very hard and seems to be gaining more energy. Her CD4 count is now 411 and her weight is mow 70kg. She has made an extraordinary recovery... Gail Johnson... S Africa.

HIV/AIDS... Tsidiso is 5 years. When he came to Nkosis Haven he was sick and his body full of sores and his ears were badly infected. He was introduced to TF+. So far his ears are fine and the sores on his body are gone. His weight was 10kg it is now 16kg... Gail Johnson... S Africa

HIV/AIDS Kenny is 20 years old. He has been on many regimens for HIV and experimental regimen with no positive response. Kenny was put on TF+ and TF along with his experimental therapy.. He has remained infectious disease free. He now has zero viral count and CD4 count of 475... David Markowitz MD... Me

HIV/AIDS... An early success with Immune Boosting naturally in a young man with HIV. KG is a 20 year old with Hemophilia who contracted HIV many years ago from "dirty" clotting factors used to treat his Hemophilia. KG has been on many regimens for his HIV, including most recently (within the past year), an experimental regimen with no positive response. If anything, he suffered from many of the side effects of retroviral therapy. Five months ago, KG started a high dose regimen of TF (3 caps 3 times daily) and TF+ (2 caps 3 times daily), concurrent with his experimental therapy. He has remained infectious disease free throughout his TF boosting. He also came to us with very exciting news three weeks ago: he has a ZERO viral count and an increasing, now close to normal CD4 count of 475. Is Kenny out of the woods completely? No, but he is now well on his way to possibly being disease free. His next counts are scheduled for six weeks from now and we will keep all posted. Kenny is a peer counselor and educator for HIV/AIDS and he is now spreading the word about TF and TF+ to members of the AIDS community. He is also a 4LR distributor and hopes to build a huge sales organization of persons challenged with HIV and Hepatitis C. As such, he said that he would not have to deal with the prejudices against those infected with HIV: seems that 4LR may just give Kenny a NEW LIFE, on many different levels. The power of TF/TF+ and 4LR continuesKenny

Hole in the face...I have some major health concerns and I wondered how I would know when and actually if transfer factors were kicking in. It didn't take long. The day my first order from this company came, I had a "shoot me" of a cold blossoming. The thing is my colds always turn in to bronchitis. I was really prepared for the initial feat. I started the transfer factors and three days later, every cough and snuffle was absolutely gone and I was totally amazed. The other thing that happened was, I had a hole in my face, and now, I know this sounds strange, but it's the best way I can describe what a cosmetologist did to my cheek, 23 years ago. About every two weeks, I would have to do my ritual cleaning and poking around so the spot wouldn't get infected. It was actually a 5mm hole. Well, about two weeks ago I got all of my stuff together getting ready for my ritual and I got my magnifying mirror and know what, that hole was gone. This is after twenty-three years. That hole was gone! You know, I always was one who caught every bug coming down the tide. I realize now that it wasn't that I was born under some sort of a cloud. Now I see and now I know it was because my immune system just never had the "umph" to protect me effectively. Now, this is the first time I am really hopeful that one day I am going to be able to say that my long standing health issues are finally dissolved. And until then, I'm going to tell the rest of the world about 4Life and transfer factors... Rebecca N.

Hodgkin's disease... When I was only 27, I received the terrifying news that I had Hodgkin's disease. I was devastated. The tumor in my chest cavity was so large that I completely filled my entire rib cage. I began on chemotherapy. At that time, my immune system was down to 2000 points. I had a friend who I knew could help me with nutrition; his name is Mike Akins. Mike recommended several supplements to strengthen my immune system. Then, Mike introduced me to transfer factors, and I began to take 12 a day. Much to my doctor's surprise, my immune system began to go up. In fact, it went all the way BACK up to 7200. The doctors said that they had never, ever seen anyone's immune system go UP during chemotherapy. Well, then the chemotherapy began to fry, literally fry my lungs, so they had to discontinue it. Amazingly, while off of the chemo, and on the transfer factors, my tumor continued to shrink. Again, the doctor's were shocked, but I went ahead and took radiation with my immune system staying up!! Now I am taking transfer factors and enhanced transfer factors. My tumor is completely GONE, and I am 30 years old. I have been free of cancer for over 10 months. This is not just a necessary product for everyone; it is something I will never be without. Thank you Mike Akins, thank you Dr. Rob and transfer factors... Ann L.

Hay fever ... MF has suffered every year with hay fever. She has been taking Rite-Start Women for

about 7 weeks and despite some minor sneezing this is the first time in 3 years that she could cope without taking any hay fever drugs. MF/New Zealand

Hay fever ... My husband has particularly bad hay fever and usually at this time of the year in the Southern Hemisphere would be taking Polaramine, or an equivalent, at least once daily. Recently he has managed to do without medication and experienced fairly minor symptoms.

High blood pressure ... My own brother and brother - in law had high blood pressure which is now back to normal on TF+. CY/Malaysia

Infection, bladder... I got another bladder infection and decided not to take the usual antibiotics and loaded up on TF+. I was really impressed that my infection cleared up in 24 hours.

Infections, yeast...I really am thankful for TF+. I have suffered for years with infections of various kinds. Yeast, bladder, kidney, and sinus infections just kept on popping up. I began taking Transfer Factor Plus™ 18 months ago. I have been basically infection free now for that long. At first I would get a mild infection but nothing like I did before.... Karen T.

Infections, ear...Over the past 4 years, I have experienced chronic Bronchitis, sinus infections, ear infections and conjunctivitis. I started taking 3 capsules of Transfer Factor™ a day for the first 3 or 4 days and didn't really notice much. I talked to Dr. Rob, and he encouraged me to go to 9 capsules a day. Due to the fact that I only had 1 bottle on me, I went to 6 a day. Well within 3 days I started breathing better, feeling more energy, feeling better than I had felt for 4 years. I have been on the Transfer Factor™ for 2 weeks and am taking 9 capsules a day and my health is back. Transfer Factor™ is the only thing that has been able to bring my energy level back up to where it is. I am so excited about being able to help people with their health, but also being able to share a product that can help them with their wealth. To give them an opportunity to make a living doing something that is helping people. I am so excited to be involved with the people and the company. I appreciate all that has been given to me...

-Julie Cardenaz

Infection, staph...I had a type of staph infection on my arms that would itch so bad I'd end up with bleeding sores. After 3 weeks on 4Life™ Transfer Factor™, the sores are finally gone... Bob B.

Infection, Sinus... A 58 year old woman who has had 2 sinus surgeries and many sinus infections. She has been treated with antibiotics and cortisone many times. She has been taking TF+ and has not had any major infections in the past 8 months. She says she will not be without the product. G... Wa

Infections. Sinus...My partner Barbara and I have worked for four years with herbs & vitamins to restore my health. 4Life™ Transfer Factor™ has done that in less than 3 months. Over the past four years, I have experienced chronic bronchitis, sinus infections, and other conditions. I take every herb or vitamin I can get a hold of to build up my immune system. In the last six months I have been on antibiotics 4 to 6 times with sinus infections. I started taking 6 to 9 Transfer Factor™ a day. Within three days I started breathing better than I had for four years. 4Life™ Transfer Factor™ is the only thing that has been able to bring my energy level back up to where it used to be... Julie C.

Infections, staph...For years my friend had a staph infection on his arms that would itch so bad there would be open sores, and after 7 days on 4Life™ Transfer Factor™ the sores were healing... Kevin O.

Infections, ear...As a practicing Pediatrician I actively use 4Life™ Transfer Factor™ in my practice and look forward to drastic decreases in the number of colds and their complications, and middle ear infections that are so common. My Transfer Factor™ kids shows an 85-90% reduction of illness as 'sick season' in Maine has started... David Markowitz, M.D.

Influenza...I came down with a very bad case of influenza a couple months ago. I had swollen glands, a high fever, a very bad sore throat, the cough -- and I had to give a lecture the next day. I doubled up my dose of Transfer Factor™ that day and the next day. Within 48 hours from the start of the infection it had resolved itself and I was up and around -- which is absolutely amazing for me, and not at all my pattern... Rita Elkins.

Infections, ear...Since my son, Elijah, was born he has suffered from severe ear infections. He was constantly put on antibiotics and had tubes put in his ears. He is now four years old. He has been on transfer factors. He has not experienced an infection... January Jackson

Infections, ear... Last Wednesday I started to get another ear infection in my left ear. I get these stupid things about 4 or 5 times a year and they usually send me to the nearest clinic or emergency room about midnight. It seems to always happen at night and/or on a weekend. By 11P.M. the pain was going down my neck. Not good. When that happens I know I'm really "in for it" and am headed to the clinic - fast. It usually takes 2 to 3 days for the antibiotics they give me to get rid of it when it gets to this stage. I decided to "test" my new enhanced transfer factors with me as the guinea pig. I took 4 about 11Pm, got up at 3AM and took 4 more, got up at 7AM and took 4 more, got up at 10:30AM and took 4 more. Now that's probably way too much but I was hurting and didn't want to mess around. The pain began to subside instead of increasing, by the time I got up at 7AM. It was much better by around 2PM Thursday afternoon... Jim Clary

Infections, sinus and ear...I listened to the information a friend gave me about transfer factors because my seven year-old daughter has had numerous sinus and ear infections during her life usually using an antibiotic at least 4-5 times a year. The last time she was sick prior to starting the transfer factors it took two antibiotics to actually clear up her infection. I decided to buy a bottle and just keep it on hand, but hadn't given it to her yet. About 3-4 days after I got the bottle she woke up from a nap with a high fever, 103°, and her ear was hurting. I had drops for her ear for the pain so I did put those in, and I gave her five of the transfer factors mixed in with a little grape juice since she doesn't swallow capsules well. She went back to sleep and about four hours later she woke up, and I repeated it giving her five more in some juice. She slept some more heading into the night. By morning when she woke up her fever was gone and she was feeling fine. She actually went to her little summer camp program that afternoon... JoLynn Carr

Infection, gum...I was sick for many years, and I know herbs helped me to get back to life. However, my immune system was still down, and I had a severe infection in my gums that I could never get rid of. I heard two people talking about transfer factors. It interested me, but I didn't think any more about it until one of them called and we were talking about it. Then another called me, and that's when I really got interested. I listened to the 800-number, then I called her back and said I wanted to get transfer factors for myself. When my product came in I took five that afternoon, then I took two more that night before I went to bed. Well, the next day I took five and two, but I had already begun to feel better. The third day my gum infection was gone... Carmen P.

Infections...I really am thankful for enhanced transfer factors. I have suffered for years with infections of various kinds. Yeast, bladder, kidney, and sinus infections just kept on popping up. I began taking enhanced transfer factors 18 months ago. I have been basically infection free now for that long. At first I would get a mild infection but nothing like I did before... Karen

Infection, tooth...The first time I took enhanced transfer factors, I had a badly infected tooth or gum. My jaw was swollen with inflammation, and the pain was severe. I took six (2 three times) the first day, and the next day I was ecstatic at the improvement. Finding myself with no symptoms after just two days on the product, I was spared a dreaded visit to the dentist. What a thrill to have something so wonderfully effective! Quite amazing actually. Judging by all the other dramatic testimonials I've read, this has to be the most eloquent natural product out there!... Dusty Dalton

Infection, Staph...I had a type of staph infection on my arms that would itch so bad I'd end up with bleeding sores, but after 3 weeks on transfer factors, the sores are finally gone." Bob B.

Infection, yeast..."I am a 61 year old man and I've had a Candida yeast infection for quite a few years. I lost a lot of weight from it. I normally weigh 175 pounds and I was down to 155 pounds. After getting transfer factors, I immediately started taking it. Within three days, I had a tremendous appetite. The next day, I was on top of the world. I gained those 15 pounds back within three weeks after starting on transfer factors... Denton B.

Infections, sinus...I was not breast-fed, so I didn't receive a lot of the transfer factors that I needed. Consequently, I've gone through a lifetime of colds, ear infections, sore throats, and sinusitis. I've been treated with antibiotics my entire life. About two months ago, I came down with sinusitis and the doctor put me on antibiotics. But they weren't working, so they gave me cortisone steroid shots. My sister sent me some transfer factors. For the first time in my life, I was able to recover from sinusitis without antibiotics. I'm sold and I am very thankful... Jill A.

Infections, ear...Because of a car accident in November of 1997, I was unable to return to my job as a school librarian until the beginning of the 98 term. The fumes from the 3-year-old carpet in the library immediately made my throat and nose burn. Within a week, I had a terrible cold, which developed into an ear infection, laryngitis, bronchitis, and eventually pneumonia. I got over the pneumonia, but the sinus infections, laryngitis, tightness in my chest and throat, and ear infections still plagued me. Early in November, I learned about transfer factors. I took 3 capsules, 3 times a day for 3 days then cut back to 2-3 times a day, then 1-3 times a day. Within a week, I felt great... Mary Anne S.

Infections, ear...Last year, I got an infection in my ear called "swimmer's ear." The last time I had it I didn't want to go for the antibiotics so I started taking a lot more vitamin C, but it didn't go away; it got worse. Then I went out and got some goldenseal and Echinacea and started using them, but it didn't go away. I finally gave in. I said, "Well, I better go get the antibiotics." Tuesday of last week I got another earache. I was taking a maintenance dose of transfer factors but I decided to take some more of it and just really see what happened. So I took 10 transfer factors capsules, then four hours later I took four more. Four hours later I took another four. I woke up Wednesday morning and it was 90 percent gone. It was there just slightly, nothing like the night before, and through the day it just totally disappeared. I was totally amazed, so I'm a believer... Ray M.

Influenza...I came down with a very bad case of influenza a couple months ago. I had swollen glands, a high fever, a very bad sore throat, the cough -- and I had to give a lecture the next day. I doubled up my dose of transfer factors that day and the next day. Within 48 hours from the start of the infection it had resolved itself and I was up and around -- which is absolutely amazing for me, and not at all my pattern...Rita Elkins

Intestinal virus...Back in March, my son Bryan came down with Rotavirus which is a severe intestinal virus causing severe vomiting and diarrhea and usually hospitalizes kids due to dehydration. Our pediatrician said there was nothing to do but let the virus run its course and expect to experience the diarrhea from 2-4 weeks. I didn't like that response and chose to give Bryan transfer factors - one capsule in his formula in the morning and one capsule at night. In two days Bryan had kicked the virus out of his system and was his own happy self. Our doctor couldn't believe how fast he had recovered and had never seen someone so sick with this recover so quickly... C. T. - Pennsylvania

Infections...I am so thankful for enhanced transfer factors. I have suffered from sinus infections and bronchitis for at least a dozen years. I have been on antibiotics and taken every nutrient I could find. I received a postcard in the mail and read a Naomi's testimony. I couldn't wait to try this product. After I received my product it wasn't more than a couple weeks before I was feeling better. Now for a couple months, I have felt better than I had in many years... Marsha Miles

Immune system...I have a small health food store and Transfer Factor has been the greatest product that I have come across in ten years. I've never had anything that's given me the constant feedback that Transfer Factor has on the immune system in relation to allergies, asthma, chronic sinus infections, colds and flues--just on and on... Diana

Imbalance hormones...For years I have suffered from an imbalance in hormones. Emotionally, I was on a roller coaster. I am 49-years-old and have been on Premarin. I have had fibrocystic cysts removed from my breast. I love 4Life's™ FemPro™. Since I have been on this wonderful product, my emotions have leveled off. Lumps have stopped forming and my monthly cycle has normalized... Donna F.

Kids...My 4½ year old son has been sick ever since he was born. We went to the doctor at least once a month. In December of 99, he had croup and pneumonia in the same week. We started giving him TF. He was well within a week. He has only been to the doctor twice since then. It is working great for him. I'm so glad 4Life came out with TF Kids™ because now it will be so much easier to give TF to him everyday... Kristy Griewahn

Kids...In approximately 250 patient months of kids on 4Life Transfer Factor, only one has returned for antibiotics, and that was after 2-1/2 months. I had been seeing him in my office every 2 weeks prior to using 4Life™ Transfer Factor™.

Kids...In approximately 250 patient months of kids on 4Life Transfer Factor™, only one has returned for antibiotics, and that was after 2-1/2 months. I had been seeing him in my office every 2 weeks prior to using 4Life™ Transfer Factor™... David Markowitz, M.D.

Kidney...A couple of weeks ago I got very, very ill--so ill that I had to go to the hospital. I had a tremendous pain in my side and I was pretty sure I had a kidney infection. It usually keeps me down for about 20 days. For a week and a half, I couldn't eat and I threw up and had diarrhea all day long. My husband got in contact with someone who was a distributor at the company and I decided to quit all my other pills and just take transfer factors. The next day, I took nine--three in the morning, three in the afternoon, and three at night. The day after that, I had my first meal. I was grateful that I felt so much better. I really believe it's the transfer factors that have given me the energy that I need... Isabel A.

Kidneys, nephrotic ... My son Jasper, was diagnosed with nephrotic syndrome (in laymen terms - kidneys not able to sieve protein molecules) when he was 11 months old. He is now 7 years old. His prognosis was not good; his health got worse from year to year. I almost lost him on September 11, 2001 after he went into shock and lost consciousness due to attacks from Chicken Pox and another stomach virus. I was advised by the doctors to improve his immune system, otherwise he will have a high chance of having kidneys failure in 2002. He has been treated with steroids, so much that he had become steroid dependent. The toxicity of steroids can be seen on his face and all over his bloated body. In June of 2002 I started him on TF+, 6 a day. I could see visible results after only 2 weeks. His hairy hands and body became not so hairy. He started to slim down. His daily pee test showed no trace of protein. Since then he is sick less and he recovered from a cough without antibiotics. So far, he has not fallen ill except for 2 times of cough virus attacks. This is unlike the past when I had to visit the doctors for antibiotics every other week. Currently, he is living like any other normal kid. I do not need to control his diet. He was on salt free diet for the past 5 years... CY/Malaysia

Kidney..."My who has suffered with a serious kidney disease for the past 10 years, e her Achilles endon away from the bone around a year ago, began taking tfactors, along with Fibro AMJ, 7 days ag . She has been taking about 10- criptions for the above conditions, none of which had helped wi h her helems. Starting on the 4th day of taking the T.F. & Fibro AMJ (A.M.), at theended dosage of each per day, she began to notice an improvement. Today, ys it's better than it's been for a

very long time, and is reporting that so feeling an improvement in her general well-being. She must be, since over the past few days she has vacuumed her house, washed some windows, and washed & waxed her car. That's more activity than I've seen from her in years! Many thanks to everyone involved with these remarkable products. My mother-in-law is starting the same regimen next week. I'll keep you posted on her progress, as well." Jill

Kidney infection... The grandmother of my friend was in the hospital with a severe kidney infection. The doctors had planned on putting her on kidney dialysis. My friend gave her Chioce 50 and TF+ while in the hospital. Within days the infection cleared up and the doctors sent her home saying that she does not need the kidney dialysis. My family has taken grapeseed for many years and truly believe in its healing power. We are extremely happy with the products and would recommend them to anyone... Darlene...NC

Kidney...A couple of weeks ago I got very, very ill--so ill that I had to go to the hospital. I had a tremendous pain in my side and I was pretty sure I had a kidney infection. It usually keeps me down for about 20 days. For a week and a half, I couldn't eat and I threw up and had diarrhea all day long. My husband got in contact with someone who was a distributor at the company and I decided to quit all my other pills and just take transfer factors. The next day, I took nine--three in the morning, three in the afternoon, and three at night. The day after that, I had my first meal. I was grateful that I felt so much better. I really believe it's the transfer factors that have given me the energy that I need... Isabel A.

Kidney failure... Originally Cynthia was taken to the emergency room in very serious condition and then she was placed in ICU, where she has remained since then. The head physician didn't see how she could live. The bacteria had ravaged her muscles, liver, pancreas, and kidneys. For at least ten days Cynthia has suffered from kidney failure gaining over 30 pounds since she could not eliminate liquid. They used furosemide to move some of the liquid through her, but the kidneys were not purifying. The kidney marker was up to 12+ and the physician didn't believe there was much chance that the kidneys would ever function again. We talked the physician into using transfer factors after it didn't look like the antibiotics were going to do the job and seemed that the kidneys were too far gone. I am very happy to report that we got word from the hospital today 13 days later that Cynthia is to be released tomorrow from the hospital. One of the nurses said, "she had never seen a patient come back from the condition that Cynthia was in, it must have been divine intervention." Of course we cannot know exactly what the total answer was that saved Cynthia's life. Cynthia has been ill for 17 years. Before she had this last event, her body weight was down to 89 pounds so when she was hit by this ravaging infection it was considerably more dangerous. The doctors shared no hope that she could recover, actually just the opposite. Today she is laughing, joking and excited about going home. Was it transfer factors? Was it the wonderful care of the doctors and nurses? Was it prayer? Maybe all three. We are finding over and over again that wonderful things can happen when your immune system is filled with intelligence and working at top efficiency. Thanks for all of your prayers... Kay Bergen for Cynthia Bergen

Lyme disease... I have had Lyme Disease for sometime now. A friend recommended taking enhanced transfer factors. I was very skeptical about taking it because I have taken so many different types of pills, it just seemed useless. After noticing a decrease in stamina over a period of time, I decided to give enhanced transfer factors a try. I am absolutely convinced and believe that enhanced transfer factors helps my body repair on a daily basis... Karen

Lung congestion...When I first joined this company, I was really eager to try transfer factors because my 9-year-old grandson had lung congestion for months and decongestant pills and cough medicines were simply ineffective. I gave him two capsules of transfer factors. When I got home, my daughter called to report that there had been no coughing since we'd given him transfer factors. The next morning, the cough that he had had the last several weeks was gone. I have had lifetime attacks of bronchitis and laryngitis, neither desensitization nor strong medications ever helped. The other day, I had to mow the lawn before more rain so I fortified myself with transfer factors and went out into that pollution, expecting to mow only 1/4 of an acre and then quit because I'd be in

trouble. I was having such a good time and no problems at all that I did the entire year and was looking around at the neighbors' yards to see if they'd mind if I did theirs. I'm feeling good with no coughing at all since the transfer factors. This is the very first product I have ever taken which has demonstrated immediate improvement. After a lifetime of sluggishness my immune system must be shocked and delighted, and so am I. Marilyn K.

Lupus...I contracted systemic lupus at age 11 and have experienced many difficult periods over the past 13 years. In the early years it attacked my central nervous system and radical measures were required to slow the disease. I had two rounds of chemotherapy and several steroid pulse treatments. I have been taking steroids daily in varying doses all these years, but have continued to have several reoccurring episodes every year. I have taken vitamins and herbs, along with various other food and vitamin supplements. I have also tried juicing for extended periods of time and continue to make juicing part of my diet. I have tried anything that I thought would help me control my health so I could stop taking steroids. About four months ago I felt the onset of another lupus episode. I developed a pain in my chest that hurt when I tried to breathe in deep. It felt like someone was stepping on my chest constricting my breathing. The pain continued to get worse so that I finally called my doctor, who sent me to a cardiologist. He told me I had paracartitis and that I would have to increase my prednisone. I do not like taking prednisone and I don't like increasing my dosages. When I came home from the appointment I noticed that first box of 4Life supplements had arrived that morning. I began taking them that night. I also decided that I would not increase my dosage of prednisone as much as the doctor had prescribed. The next day I felt an improvement in my breathing and the pain had lessened. For the next couple of days I continued with the 4Life™ Transfer Factor™, BioVitamins™, and the BioEFA™. I was feeling great and I reduced my prednisone to the normal amount. The next week I went in for an ultrasound to check for fluid around my heart. There was none at all; it completely disappeared. The nurse remarked, "Boy, those steroids really did their job!" I just smiled and said, "I guess so." But I was really thinking, "This 4Life™ Transfer Factor™ stuff must work, because I know it's not the steroids!" I have been taking 4Life™ Transfer Factor™ for almost 4 months and I believe it has helped me tremendously. I have more energy and am able to keep a full-time job. I still have days when I am tired and feel achy, but it seems like not as often as usual. I have struggled for 13 years trying to find things to deal with my lupus symptoms. I've taken so many different kinds of herbal products and vitamins, and have tried many different remedies. Many have worked for a while but eventually I would start to feel bad again. I have been reluctant to say much before now because all these various remedies have resulted in disappointment. I am taking this one step at a time and not getting my hopes too high, but at the same time I am feeling great and doing great.

When I feel a cold or sore throat coming on (which happens frequently since my immune system is suppressed) I will take more 4Life™ Transfer Factor™ and that seems to stop it before it gets worse. I find that I still must watch what I eat and make sure that I get adequate rest to feel my absolute best. I know that 4Life™ Transfer Factor™ may not cure my lupus, but it can improve the way I feel and look at life. This has been a blessing and an answer to my prayers. I am thankful that 4Life™ Transfer Factor™ has come into my life and has made me feel better and made me happy. I've never felt better about a product in all my years of trying. It works for me!

Lupus ... I introduced TF in April to my pastor's wife. She has had a red rash on her face, neck, arms, and tummy for over a year. She has tried all kinds of very expensive creams and drugs that her doctor prescribed for her. Nothing had helped the rash. She started using TF RenewAll Cream a week ago along with the Transfer Factor. She also doubled up on the Transfer Factor a couple of weeks ago. Even before she started using the TF RenewAll Cream the rash started to disappear all over her body. Today, the rash is almost completely gone... Floris/Michigan

Lyme disease...I have been helping a bed-ridden 44-year-old woman with lyme disease who has been in bed for the last 7 years. They have had her on long term antibiotics for 8 months now without improvement. Her mom put her on TF Plus (9 per day) two weeks ago and she told her mom today that she is feeling better already! I also heard from a friend of mine regarding her father. He has a rare form of leukemia and is too old for chemo. In February, they told her to take him

home and keep him comfortable. They gave him 2-3 months to live. My friend called me and we started him on 12 TF Plus and a few other things. He is doing so well now that the blood blisters on his arms are clearing up and he is out and about. The doctors have finally started asking him what he is doing. He is telling everyone! ...Kristie Barringer

Lump on throat... My granddaughter was scratched by a cat at the age of four. She contracted some kind of bacteria. A lump appeared on her throat. The lump was surgically removed, only to grow back. She is now twelve years old and has suffered sore throats and the lump for all of these years. Her physician gave her every appropriate antibiotic without results. After one week on transfer factors, the lump and sore throat had improved... Richard Talkington, Illinois

Leukemia... ID is an eleven year old with a complex leukemia history. He was diagnosed with Acute Lymphoblastic Leukemia at age 2 with a relapse several years after chemotherapy. Next came a bone marrow transplant and THREE more relapses after the transplant. To add insult to injury, the last relapse was diagnosed as Acute Myeloblastic Leukemia, a VERY difficult cancer to treat. On to a very toxic course of chemotherapy and a slow definitive road to remission. ID was started on TF initially at month 5 of chemotherapy to help support his immune function and hopefully, reduce the chances of infectious complications. TF+ was added 2 months later. His oncologist (my medical partner) has been very pleased and impressed with the results. First, ID breezed through his therapy" tolerating very low blood counts, with no febrile (or infectious) episodes, and always in very good spirits. When last seen in early 9/99, ID was "thriving" and continues in full remission, with no infectious disease, enjoying a full life as a vigorous 11 year school kid. The "way Life should be". How has TF and TF+ impacted this young man? It most likely spared him the life-threatening complications of infectious disease. It apparently improved his tolerance of a very toxic course of chemotherapy. And it may be helping him in his daily immune fight against relapse and infectious stresses. Unquestionably, the fact that ID is alive is a miracle, one dictated by a "Higher Authority": the quality of his life may just be because of immune boosting with 4LR products... And his spirit and his will to live.

Leukemia... When I was diagnosed with chronic lymphocytic Leukemia and my white cell count 29,000 per milliliter. Chemotherapy is recommended at white cells are at 40,000 per milliliter, and since starting transfer factors it has decreased gradually to 23,500... Monte R.

Mood swings and depressions ... I have been taking Prozac (now know as Fluoxetine) for about 5 years. I have taken myself off this once or twice over this time, but the symptoms have always returned. Since being on TF, I have cut down my dosage by half. My next step will be to cut down to 1-2 caps weekly. I have done this before and the doctor said I may as well not be taking it, but I felt to have some of the drug in my system was a help. The real test will be when I have been off Fluoxetine for several months...

Mouth ulcers ... I realized only yesterday, that none of us have had mouth ulcers recently. Prior to taking TF we were plagued by them and tried dietary changes, herbs, getting more sleep, but none of these things helped. It is wonderful to be free of them.

ma..."I was diagnosed with a level 3 Melanoma 13th June 2001 after my GP remmole from my back Friday 8th June 2001. I proceeded to take 8 TF Plus a day referred me to a specialist for an appointment on Monday 18th June and appointment he proceeded to inform me of the severity of the problem and there were dangerous cells still in the area of the removed mole going to pathology report. He said that with technology that is available today he can define the area that had to be removed and had to book me into Hospital to remove a sizable chunk from my back to reduce the chance of further problems. I was admitted to Hospital the very next morning. Now comes the interesting part where the stitches removed Friday 6th July 2001 and the Doctor sat me down removing the stitches and said that I was to see him every 3 months as a caution but was at a loss to explain the Pathology results. The results came all clear, NO DANGEROUS CELLS TO BE FOUND !! I'm so thankful for the research and in particular the Professional Networkers Team, because I truly believe that we have a product that can, and

will change peoples lives. What has come out of this experience for me is a determination to promote the products to as many people as I can because I truly believe that by helping people to experience a better healthy life I have succeeded in what we are all put on this earth to do, Help others and our lives will be fulfilled. Paul Simpson

Multiple Sclerosis... I have taken natural products for years but I have difficulty swallowing and 30+ pills a day became stressful. I started taking TF2 ½ months ago and have felt better that I have in 3 years. I recently began to get a bladder infection so I increased my TF and it went away. My husband got over a bad cold very quickly after taking TF. My daughter has asthma, Her asthma is better now that she is taking TF Wendy... CA

Multiple Sclerosis... TF and FibroAMJ have really made a difference in my life. I have MC. I have days of partial paralysis and extreme flu like pains/ Since I started taking these products I find I have more good days than bad. During my good days, I feel that I have more strength then I had before. Sue H ... UT

Multiple Sclerosis... I am a mother of six and have 19 grandchildren. I've been on a lot of herbs for the last 5 or 6 years. I have MS and I was in bed all Oct. and Nov. of last year. I couldn't walk and I had chronic migraines. I started taking TF and I started feeling better. I had some strength and was not having problems with my legs and arms. It has now been 2 ½ months since I've had an episode with MS...

Nasal congestion, atopic ezema ... My son Stephen, 8 years old had a very bad case of congestion (has to breathe through the mouth while sleeping), for the last 5 years. Medication only provided temporary relief. His conditions improved significantly after 2 months on TF. After 3 months he's free of those conditions. He also has atopic eczema on the palms of both hands (rashes, skin crack and peel). Applying hand cream from the skin specialist would make the conditions go away, but it would recur within a month or so. This has been going on for the last 3-4 years. He's been on TF for 5 months now, the cracks and peel is gone, just the occasional rash. ...TG/TW/Malaysia

Nasal congestion ... After 2 months on TF an 11 year old boy's condition went away... TG/TW/Malaysia

Osteoarthritis ... I went without TF for 5 days last week and my Osteoarthritis came back with vengeance. My toes were so curled over, nodules returned below joints and walking was agony. I started taking Fibro AMJ (Australian formula) and after having 8 TF over the day and 4 AMJ by the next morning, walking was improved. Within 2 days, my feet were not as swollen and the nodules below my toe joints were also diminishing Transfer Factor truly makes the world of difference to not only my condition, (Rheumatoid was also diagnosed in 1981) but other people with the same condition! So, obviously my body needs a little more feeding but TF & AMJ combination is critical to overall Immune System being heightened and keeping Natural Killer cells in the higher numbers.... Deborah (Immunologist)/Australia

Prostate...I have suffered from the symptoms of an enlarged prostate with nightly journeys to the bathroom. Since I have started taking MalePro™ my symptoms have subsided... Frank Pearman.

PMS...After the birth of my first child, I started having PMS. Over the years, the symptoms became worse and worse until I was experiencing three weeks of PMS every month. I tried another wild yam cream, which was able to get rid of most of my symptoms. Then, I started on the FemPro™ cream and I could tell the difference right away. I will not go to bed or get up in the morning without it... Debra H.

PMS... As women know, we suffer with PMS and it can be pretty bad sometimes, the depression and moodiness. I take BioGenistein Plus™ once a day and during that certain time when PMS sets

in. I take it twice daily and it just smoothes over those feelings of anger and depression that women get with PMS... Patricia T.

PMS... I cannot tell you how thankful I am for 4Life's™ BioGenistein Plus™ and FemPro™. I have suffered for years with major PMS challenges and with fibrocystics. Since I have used the 4Life products I have experienced what I call a miracle. I have tried other products with limited results. Thank you 4Life... Tina A.

Planter wart... A 4 year old wart disappeared while taking TF... Eunice.. NJ

Psoriasis...I am a registered nurse, 64 years old and respect what medications can do. However, prescriptions were not helping my severe allergies or my psoriasis. Allergic episodes usually resulted in a mega-infection of bronchitis or a sinus infection. My psoriasis did not respond to any of the many medications. Both of these health problems are in the autoimmune category. I included 4 capsules of Choice 50 and 3 Transfer Factor in my daily supplements. The Choice 50 served as my antioxidant, and the Transfer Factor helped my immune system. Both the allergies and psoriasis have totally disappeared. Choice 50 and Transfer Factor are a dynamic combination that has truly improved the quality of life ...Doreen L

Pneumonia...Two to three times a year I get pneumonia and the last time was about a month and a half ago. I became ill on a Saturday went to the doctors and was immediately put on antibiotics and went straight to bed. A friend came over on Monday evening with TF+ and I started taking it on Tuesday. I slept Tuesday, Wednesday I was able to unload the dishwasher, cook dinner and crochet two pairs of slippers. Thursday I cleaned the kitchen, did some house cleaning, made dinner and even went out with a friend for an hour. I couldn't believe how I felt in such a short period of time. I will never be without my TF... June

Pregnancy... I've had a female problem since I started my cycle as a teenager and was in a great deal of pain. My doctor prescribed a very strong reliever and I still was no getting any relief. My husband and I wanted to start a family but I was unable to get pregnant. A friend of mine introduced me to TF and within 1 month I was pain free and within 2 months I was pregnant, I know God gave me a friend, knowing that she had TF to share with me... Missy... SC

Pregnancy... I took TF throughout my pregnancy. This was my third baby. This time I experienced no pregnancy mask, no morning sickness, and no edema. I delivered a healthy 8 lb 11 oz baby boy. He is such a good baby... Mary Lynn... NC

Pulmonary problem... A 45 year old woman who had been running marathons developed a pulmonary problem and had to use inhalers and many medications to breath. She had used cortisone many times and other brochodialators. She has been using TF for 2 years and has not used medication since she started using TF. She is back running marathons and works out full-time and baby sit her 3 grandchildren after work. Her grandchildren also take TF and they are never sick.. C...CA

Parkinson's ... I have a patient with Parkinson's disease who after being on TF for a couple of months noticed his tremors had subsided remarkably to the point of very little shakes, and slight speech improvement. Deborah/Australia

Permanent make up ... Roxana owns a beauty clinic and tells us that she is married to TF. She does a lot of permanent make up and has discovered that using the TF Spray after the procedure, the skin regenerates twice as fast. And it also minimizes the pain. Roxana/Mexico

Prostate... My husband has had an enlarged prostate for around 5 years. He has had frequent and painful urination with urgency. His PSA has stayed normal, but we are nevertheless concerned.

After all the holiday treats and lack of sleep, his prostate condition worsened more than ever. He was in great pain and would spend 20 minutes urinating. He began taking transfer factors and within 24 hours was getting some slight relief from the symptoms, and he knew he was going in the right direction. With each passing day he has improved tremendously and now after 2 weeks, he feels like a new man. Urination is painless, steady and he sleeps through the night. He hasn't felt this good in 5 years. We are hoping for a complete normalization of this 5 year condition. Debra Jenkins

Polyp in uterus ... Women in her 40s developed polyp 4 years ago and it got bigger every year. She took TF for 32 months plus Rite Start Women in between. Now there is no trace of the polyp during the ultra scan in Feb 03. "It's, gone" said her gynecologist. She also noticed improvement in her hemorrhoid condition. TG/TW/Malaysia

Severe Rash... I have been going to a highly respected dermatologist regarding a rash for the past three years. I had been taking erythromycin for most of that time along with ointments, creams, lotions, etc. Two months ago, I began taking TF and I noticed a huge improvement. I went to the dermatologist just a few days ago, and he was amazed with the improvement. He told me to just keep doing with I am doing, and I don't have to come back for a month. I am still using all of the external medication, but I am convinced that the major contributor to the improvement is the TF. I will continue with the TF indefinitely... DRW - Seattle

Sore throat... My husband, a medical doctor, was cautious about endorsing TF until he had a sore throat and TF helped him get over it in a day." Lisa K.

Shingles ... A 57 year old woman who had shingles for months and did not want any more medication found her shingles disappear after 2 weeks on TF. She continues to take TF as prevention.... L ... NJ

Shingles ... Having suffered with shingles for over a month and still not being able to sleep at night, I increased my dosage of TF to 12 a day for 3 days and had immediate relief. They have not bothered me since... Bridget/Florida

Sinus, chronic ... JT, 45 years has been suffering from it since very young, and medication always on standby. Felt good after a week on TF and after a month he was singing praises about TF. This is what he says, "of all the supplement I've ever taken, nothing comes close to TF... TG/TW/Malaysia

Sinus ... Ten years old boy had bad congestion and sniffing, after 1 month on TF. The conditions went away... TG/TW/Malaysia

Sinus ... Due to the stress of my job I developed tension headaches (back of head) for more than 10 years. At times quite bad and painful. I also developed sinus-like conditions about 6-7 years ago; sneezing frenzy, running nose and nasal congestion were common. And also there's the occasional throat infection. I also developed an ache and stiffness in the lower back. I tried many types of health supplements and herbal remedies that didn't help and medications only provided temporary relief. I took TF for a month and then a combination of TF/TF+. After a month my sinus conditions had improved considerably. After 2-3 months both my tension headache and sinus were gone and I also noticed improvement to my lower back. I was able to just get up and go; no problem with my lower back. This was a very pleasant surprise. ..TG/Malaysia

Skin... For years I've had trouble with my hands. They split open and they bleed. They itch, and they crack. They can become very painful. I was told at one point that it was a parasitic condition yet I knew, of course, it was an immune condition. Well, when I started on TF I had one finger that had not healed up for a couple of months and I really didn't know what I was going to do about it. After just a couple of days on TF, and I guess at the time I was probably taking four a day, that finger healed up completely. Then as time went on over the next couple of weeks the rest of my fingers healed up very nicely and today I don't suffer from the condition that really has plagued me for

several years. All I can say is thank you to TF, and thank you to this company... Susan K.

Scabs, sores... He had scabs and open sore wounds all over his arms. As he was rolling his shirt sleeves back he said, "You know, I've seen dermatologist after dermatologist, doctor after doctor. Nobody knows exactly what this is. They tell me it's viral in base, but they've never been able to do anything about it." As his sleeves rolled back I saw that they had gone from open wounds to blemishes in a seven to ten day period. If I hadn't seen it with my own eyes, I'm not quite sure I'd believe it. It was a real testament to the fact that we have a very, very powerful product on our hands... Kevin O'Conner

Skin, bad condition...I'm almost embarrassed to say I was so skeptical it took me three months to listen to what transfer factors would do for me. But I had a very bad skin condition on my chin and I had spent thousands of dollars going from doctor to doctor and they literally could not correct it. I tried every medication you could think of and they just simply gave up. Well it was really upsetting to me, as you can imagine. I finally gave in and I tried transfer factors internally and even topically. Within about 12 hours for the first time, it began helping. My face is practically back to normal now. I'm just so thankful for the product... Bonnie T.

Steven Syndrome...I am so thankful and so excited about transfer factors. I believe ll my heart that transfer factors have saved my life. I suffered from Steven Johnson Syndrome for years. I was hit by a number of viruses, one after another. My immune system, basically collapsed. My WBC went way down to a very dangerous level. My platelets went down. I almost died a number of times with such a weakened immune system. Along came transfer factors. I could tell almost immediately that I was getting better. I am a new person! My loved ones have a new person. Life now has color... Leslie Hoare

Thyroid goiter...I have a thyroid goiter and have been on medication for many years to control its size. Even with the medication, I have always been able to see or feel it. On the fourth day after starting transfer factors, I noticed that the enlargement (goiter) on my neck was smaller. After using transfer factors for about ten days, my goiter had noticeably improved. I hadn't even thought transfer factors could help. But I'm still feeling great... Gaye L

Thyroid... I was diagnosed with Hypothyroidism for 4 years, to the extent that my Thyroid activity was nonexistent. During this time, I've been on different dosages of Synthroid medication & Cytomel with little to no effect. Within a week and a half of starting on transfer factors, I had blood work done. The blood work showed a positive result in my Thyroid activity. After continuing on the transfer factors for another month, to my surprise (and my doctor's) the results of my last blood work came back totally normal! Other than my "previous Thyroid condition," I also have Lupus, a condition that I have been plagued with for 7 years; but thanks to transfer factors I have more energy than ever, and I have not experience any pain in my joints since I started transfer factors. For me I can say that TF are a Godsend... Bianca Pagan

Tourettes Syndrom... My son has tourettes syndrome. He's taking TF and Choice 50 (grape seed extract) along with medication to stop the tics. He is doing great with this combination. I also have a son who is ADHD who is taking TF and Choice %) along with the FibroAMJ night time. He sleeps well at night and ahs excellent grades in school. We are definitely a TF family... Sandl... NC

Tumor, brain ... A doctor here is France tried TF+ on a patient with a brain tumor who had not spoken for a month. After 5 days on TF+ the patient is speaking... France

Weight loss ... I had a baby last year and had not been able to lose the extra weight I gained while pregnant even though I exercised. After 2 ½ months on Shape 4Life I lost 16 lbs. ...Macame/Utah

Weight loss ...I was overweight most of my life. I had tried lots of diets and was not successful.

After 90 days on Shape4Life I lost 28 lbs and lowered my blood pressure and cholesterol.

Animal Testimonies

DOGS

Cancer ... About 4 months ago my 8 year Rottweiler, Daisy, developed a tumor in he paw. Diagnosed as a particularly fast growing, aggressive form of cancer, the prognosis was bleak - amputation or euthanasia. Neither option was acceptable, so I decided to put my knowledge of alternative health to work. The cancer began to spread as evidenced by swollen lymph nodes, spots on her lungs, an elevated white blood count, anemia, and elevated liver enzymes. My husband is a Naturopathic Physician and all of our animals have been treated holistically. Daisy's condition would be the ultimate challenge. We employed a variety of modalities - salve, supplements, intravenous treatments, and magnet therapy. We know her immune system was severely compromised and needed boosting for everything else to work at optimum levels. The Transfer Factor Stress Pack for Animals became a part of her daily regimen and the results were immediate and dynamic! Her most recent examination showed lymph nodes back to normal, the spots on the lungs nearly undetectable, blood work back to normal and her paw is healing with no sign of the tumor. Of course, my heartfelt gratitude goes out to my wonderful veterinarian, Dr. Nancy Harvey at the Country Club Animal Clinic here in El Paso, Texas. She has been open to every out of the ordinary treatment we proposed and supporting us all the way. She is sending us referrals now and, of course, is recommending the Stress Pack so that others can benefit from this incredible product.

Sandra Ben-Joseph/ Texas

COWS

Calf and TF ...

My dad brought me a baby calf to bottle feed because her mom wasn't making enough milk to sustain her. She was approx. 2 weeks old and didn't take well to the bottle. Because she was in such shape I began giving her 10 TF a day for a day or two. After speaking to Bonnie I cut back to 6 a day as she said that was plenty. She also had a sore on her nose. It looked like she had scratched it on something, it healed up very nicely, never got infected or looked bad. I took a picture on 3/17/03 and another on 4/3/03 and it was totally healed. (the first day or two I also added some TF Canine to her milk supplement, as I didn't have a stress pack on hand and wanted to give her all the benefits I could) Brownie is doing great, I am so thankful to have the help of Transfer Factor and all of its great benefits for my whole family!**T.D/Missouri**

Transfer Factor in Dermatovenerology

S.G. Luikova, O.B. Nyemchanyinova, E.V. Chernikova, Iu.P. Gichev
Novosibirsk State Medical Academy; Research Center for Clinical and
Experimental Medicine SD RAMS, Novosibirsk

INTRODUCTION: According to current theories psoriasis is complicated by recurrent herpes infection, which brings about the suppression of interferon production and suppressed T-cellular immunity. This necessitates carrying out the immune status correction in addition to specific antiviral therapy. With this in mind we undertook the evaluation of the clinical effectiveness of

transfer factors in this group of patients with psoriasis who also suffer from recurrent genital herpes.

OBJECTIVE: The aim of this investigation was to study the effects of enhanced transfer factors in a complex treatment of patients with psoriasis and recurrent genital herpes.

METHODOLOGY 1: This study was initially conducted with 8 patients with exudative psoriasis, 5 children age 9-14 and 3 adults, ages 19-46. Four of these patients were manifesting dermatosis for the first time. All patients had widely distributed eruptions. Since traditional methods of treatment were not effective enough, we added enhanced transfer factors from bovine colostrum. The product was administered according to the following scheme: 4 capsules daily for 14 days and then 4 capsules twice a week for 14 days. The product was obtained from 4Life Research, USA. The clinical effectiveness of the product was evaluated.

RESULTS 1: By the end of the course of treatment 7 patients demonstrated a marked improvement of skin condition. We prolonged treatment in only one patient for an additional two weeks. This patient has suffered from psoriasis since 1998 and exhibited signs of arthropathy.

METHODOLOGY 2: We continued the study with an additional 9 patients, ages 18-38, with disease duration of 6 months to 5 years and that had suffered from severe (only several days to six weeks remission) or moderate severity (2 to 3 months remission) courses of the disease. During the recurrent course of the disease the majority of patients received antiviral (acyclovir) and non-specific immunomodulating drugs, biogenic stimulators and others, which in the majority of cases resulted in only a slight prolongation of the remission period. Enhanced transfer factors were given as a monotherapy to the patients during periods of genital herpes relapse according to the following scheme: 4 capsules daily for 2 weeks, then 4 capsules 3 times a week and in the following 2 weeks 4 capsules twice a week. The therapeutic effectiveness of the product was evaluated according to the duration of remission and the duration and severity of relapses as compared with the course of treatment without the use of transfer factors.

RESULTS 2: Seven of nine patients receiving transfer factors demonstrated stable antirecurrent effects. Two patients had a relapse on the 2nd and the 4th weeks of the treatment, but it was of an abortive nature and did not affect quality of life. Pain acuteness in these instances was less pronounced than during the previous relapses. In the following 6 weeks the patients demonstrated stable clinical remission. **CONCLUSION:** We concluded that the use of enhanced transfer factors in patients with psoriasis and recurrent genital herpes gave improved clinical results which prompts the expediency of further clinical studies.

Transfer Factor Study with 20 Patients Darryl See, M.D. conducted the following studies.

Twenty patients, 12 men and 8 women, were selected for this in vivo study. The average age was 49.3. The twenty individuals were each level 3 or level 4 cancer patients. Each patient was basically sent home by his or her oncologist to die. The average life expectancy was 3.7 months. The protocol was to place each patient on 9 capsules per day of **Transfer Factor Plus™**. The patients were given a number of other general nutrients*. After eight months, 16 of these individuals were still living and were either in remission, improving or stabilized.

The baseline for natural killer cell function was 6.4. Within 4 weeks the average NK Cell function was increased to 25.7 and in 6 months it increased to 27.6. This represented a 400% increase in NK Cell function. This is an ongoing study. This study has been submitted to a peer reviewed publication.

*Antioxidants, Digestive Enzymes, Probiotics and multi-vitamins.

The following study was conducted at the Institute of Longevity. The purpose of the study was to

examine the synergistic effects of the components of **Transfer Factor Plus™**. Each component was tested separately and then tested as a whole unit. Together the proprietary blend increased NK Cell functions more than the sum total of all of the ingredients tested separately. This study indicates that the intelligence contained in **Transfer Factor™** has an enhancing effect on other nutrients.

In vitro study:

Ingredient 10 GM /ml NK Function

PBMC (Control) 25.6%

Zinc 26.8% NS

Proprietary Blend 59.9% <0.02 (Mushrooms etc)

Zinc +Prop. Blend 95.4 <0.01

Transfer Factor™ alone 128.5% <0.01

Complete Prod. (Transfer Factor Plus™) 273.6% <0.01

The sum of the individual product is less than the Complete Product (Transfer Factor Plus™).

There is synergy in having a combination of Transfer Factor Plus™.

This information has not been evaluated by the FDA or 4Life. This information is not intended to promote any of our products as a medical cure. Nutrients do not directly cure diseases or destroy germs. Nutrients reinforce the immune system. Our immune system naturally fights germs and attempts to keep us well. Although there is a volume of research that would indicate nutrition has a powerful effect on our immune system and health, all research is open to interpretation and contradictions. We cannot conclude that in vitro (In the lab) studies will work in the human body. When analyzing in vivo studies (in the body), one must understand the nature of the study and products involved in order to draw a viable conclusion. Remember that even doctors have differences of opinions. Some doctors will endorse natural products for medical use while others will not. A possible placebo effect must be taken into consideration when reviewing testimonies. The preceding information is provided as one source of educating oneself.

Dena's Transfer Factor Story My name is Dena Guidice, and I want to share u how TF has saved y life. In November of 1998, I was diagnosed with lu er. At that time, my team of doctors recom ended that the best course of ent for my cancer would be to perform radiation and chemotherapy sim ltan I got started with both treatments immediately and was given th st dosages of treatment possi le. Over the next 90 days, I suffered from a he normal side effects including weakness, vomiting, hai loss & severe wesi. My radiation and chemo treatments ended late February 1999. On March 25 , I went in for surgery (as planned), and the doctors removed a tumor fr ight lung along with the op 1/3rd of my lung and three sections of my ri surgery went very well, and the doctors beli ved that they had succesremoved all of the cancer from my body. After my surgery, I wena additio al 12 weeks of chemotherapy from May to July 1999, as a "safure." It was during this time that my body became so weak that all I could sleep and lie in bed all day. I lost all of my hair at thi point, and my ails and teeth became so brittle I started to lose them as well. I lostetite completely an got to the point where I weighed only 88 pounds.sick as I was in the summer, I was still hopef l that by fall I would get er after the chemotherapy was out of my system. My hope was short lived, however. In August, I found a lump under my left arm. After another surgery to remove that tumor, the tests confirmed that I had malignant lymphatic cancer (cancer of the lymph nodes) and that the cancer was all over my whole body. At that point in time, my team of doctors told me there was nothing they could do for me. I had stage 4 (final stage) cancer and I had a maximum of 4 to 6 months to live. They told me to do everything I've always wanted to do in life within the next 45-60 days because after that, I would be much too weak and too sick to do anything whatsoever. By this time, I was convinced that I was going to die - especially since the doctors had never seen a person live beyond 8 months, in my condition with my kind of cancer. At this point, I shared the devastating news with my kids, and we all took a trip to Hawaii. In my own mind, I knew that this would be my "farewell trip." I had given up every ounce of hope, and I had mentally prepared myself to die. It was at this time (1st week in October) that my son finally convinced me to start taking Transfer Factor. In my mind, I was 100% convinced that it wouldn't do anything for me, but

nonetheless, I started taking six Transfer Factors Plus and six regular Transfer Factor capsules every day. Within 30 days, I started to feel a little stronger and regained my appetite, but I still believed in my mind that my life was soon to be over. I kept taking the product. By January 2000, about 90 days after starting on Transfer Factor, I found myself even stronger and had gained back 7 pounds. I continued taking Transfer Factor every day. It's now been 7 months since I started taking Transfer Factor (May 2000). I've now gained a total of 26 pounds and I feel healthier than I've felt in over 2 years. I just went to see my doctor 2 weeks ago, and he said that, "I'm a living Miracle" and that I have no signs of cancer. Transfer Factor has not only saved my life, it has given me hope for tomorrow and the years ahead.

		
	<p>Before TF & TF+ Sept. '99 Weighing 88 pounds - in Hawaii with family members.</p>	<p>After TF & TF+ April 2000 - weighing 114 pounds. "You would never guess that I was supposed to die over 3 months ago."</p>

Mary Ann's Testimonial

Mary Ann Myers age 45 has diabetes and is now taking 500mg. of Glucophage. She had cancer 3 yrs. ago and is taking Tamoxifen.

She started taking 8 Transfer Factors per day and sprinkling 2 capsules directly on the wounds for 1 week. She's now taking 6 capsules per day and continues sprinkling Transfer Factor on the wounds. These are the results at this time since she's been on Transfer Factor.
