AdvoCare receives patent on Muscle Fuel....WOW!!! That's HUGE.

## About Me

**BRIAN**

My colleagues and I work with 3 people at a time showing them how to lose weight, feel great and add multiple streams of income to their financial portfolio. My company is in 28 out of 32 NFL locker rooms and over 50% of Olympians were involved with our company during last Olympics.

AdvoCare was founded back in 1993 by Mr. Charlie Ragus. Charlie was a very successful distributor long ago with a company called HerbaLife. He wanted a company of his own but more than that he wanted a company that stood for something. A company that had integrity, character and one which was founded with guiding principles such as honor GOD through Faith, Family and Friends.

With the guiding principles in place he went to work establishing a Scientific / Medical Advisory Board with Doctors such as Dr. Robert Hackman, Univ. of California Davis; Dr. Stanley Dudrick who pioneered the research & development regarding the I.V. (intravenous tube feeding)...and many others. It was imperative to Charlie that the products were both safe and effective...and worked every single time.

Charlie also wanted to create an opportunity for average people to make an above average income and live an above average life. I have been with AdvoCare now for 1 year and I can say that the environment and culture is fantastic. These folks don't want your money, they want your heart...they want you to go out and help others lose weight, feel better and get in shape...physically, mentally, spiritually, and financially.

AdvoCare is all about informing people about nutrition, where they are spending their money and replace those things with AdvoCare products that are far superior to those on the shelves in the marketplace....Diamond Mike Ferro says this; "Folks are spending money on all those products that are not good for them or are not doing the right things to their bodies and we have a solution for them...we offer products with twice the nutrition, with 1/3 the sugar for 1/2 the cost." Some of AdvoCare's products are *sugar free* and are great for diabetics.

<http://ezadvocare.com>

SPARK energy drink is only one of AdvoCare's many great products and has helped over 3000 children stop taking ritalin for Hyperactivity. This drink is great for mental focus and mental clarity. If you haven't tried one yet, you need to find a local distributor and get some.....don't take my word for it, try for yourself.

I was personally diagnosed with Crohn's disease in 1989 and have had 2 surgeries since. In March of 2009 I weighed 130 lbs at 6'1" and was basically a BAG of BONES. 1 year later after taking AdvoCare products 100% compliant, I now weigh 170 lbs of lean muscle and feel AMAZING. *\*See before and after photos above.*

Hi Brian, I know this was posted quite a while ago. I just started the 24 day challenge today. I want my husband to do it also, but we are not sure about the cleanse part as he has lived with Crohns disease for the past 18 years. How well do Crohns patients do on this product and cleanse? Any information would be most helpful. Thanks so much....
