**TREVO** December 28, 2015 · 🌐

**WHY ARE AUTISM CHILDREN GETTING SUCH FABULOUS BENEFITS FROM TREVO?**

Take a look at a few of the 174 ingredients in Trevo that are causing such positive testimonies.

Trévo partnered with the Dolphin Foundation in Uganda to support Autism. Several children, ranging in age from 6 to 16 years old, took Trévo for five days and the results were remarkable.

One child who previously could not stretch her legs out and had troubles keeping her eyes open was able to easily stretch her legs without any pain and open her eyes for 30 minutes. Another child who couldn't speak or converse with peers was able to make conversation. A young girl who could not run and struggled with painful convulsions is now running around and has been convulsion-free since she began taking Trévo.

**INOSITOL**

Inositol is a type of sugar related to glucose. It occurs naturally in the body and is present in many foods. Inositol is a fundamental ingredient of cell membranes and is necessary for proper function of nerves, brain, and muscles in the body. It is essential for helping the cells in the body communicate with one another, a process known as cell signaling. Used with choline, inositol helps to metabolize fats and cholesterol in the arteries and liver.

**BACOPA**

Bacopa has been revered for centuries in the Ayurvedic herbal traditions of India for its ability to enhance clear thinking and support memory function. Traditionally, bacopa extract is reported to be a "brain tonic." The phytochemicals found in the bacopa leaves include alkaloids, saponins, flavonoids, beta-sitosterol and betulinic acid. A powerful antioxidant, bacopa helps maintain the structural and functional integrity of the membranes surrounding the mitochondria, a portion of cellular DNA that can degenerate with age. It also protects gastrointestinal health by raising mucosal defensive factors.

**CHOLINE BITARTRATE**

Choline bitartrate is an essential nutrient involved in many body functions, including brain function, memory, and heart health. Choline has also been shown to be essential for proper brain development in infants and children. Supplementation of animal diets with choline at particular times of brain
