DOCTOR ONIST / FOR DISCHARGE

Couple of months back, as part of regular health check up, my father has visited Doctor and was suggested Diabetes test. Shockingly, we found an alarming rate of Blood Sugar(Post Lunch-248) in his body. Even though he was on supplementation, he was not regularly using it and if there is anything he used it was only Nutrilite Daily. But after realizing that he had high blood Sugar, i made a strict diet regimen at home for him and also made him use all Nutrilite products which we normally suggest for Diabetes( Protein Powder, Daily,Salmon Omega,Fiber,Glucose Health) along with morning walk and Medication.

We just got it checked it today morning and everything came back to Normal(128). My family is shell shocked with the result. Something the medication couldn't do for years was done by Nutrilite.

My faith on the products shot up to another level with this result and now it is responsibility to promote these products to as many people as possible with conviction.

I am attaching the Blood/Urine Sugar Report of the same. Thanks to Nutrilite and Amway!!!!!!!
