

Linda Ishibashi

"Seven months of chemotherapy and radiation treatment for breast cancer had left me overweight, suffering anxiety with panic attacks, insomnia and depression," says Master Affiliate Linda Ishibashi from Narwee, NSW. "Within three weeks of taking Reliv Classic and Innergize, I slept a full six hours, waking without anxiety. My depression lifted and I was feeling positive.

"When Slims simply was introduced, it gave me the boost I desperately needed to begin reducing my weight, losing 3kg after only four weeks. Reliv's essential nutrition plus FibRestore, helped maintain a state of renewed health and calmness plus improved my energy levels."
