April 2008

Not too long ago I was introduced to PXP. I am a type 2 diabetic and I took PXP for a couple of weeks and then went to the doctor for my yearly checkup. Usually I go every April and have a complete physical. The doctor told me that my bad cholesterol was high and my good cholesterol was bad.

I went back to the doctor 2 weeks later and the doctor actually hugged me and I was afraid he was going to kiss me! He was so happy and said I don't know how many tacos you are eating or what else you are doing but keep it up!

Because I am diabetic I go to the eye doctor once per year per doctor's orders, because diabetes affects the eyes. He said my eyes were great and I can now see sometimes better with my glasses off than with them on.

Last year after taking PXP I had a bad fall and fell 20ft and fell on blacktop and broke a rib and my wrist. The doctors set my wrist and when I went back into the doctor after 2 weeks my doctor could not believe how fast I healed, he was very surprised. I run out of PXP once and the aches and pains came back and I felt sluggish. I am 60 years old and work on a farm and my job is physically demanding. PXP gives me much more energy and I feel so much better by because of PXP. I will never stop taking it and I feel this product is sent by God!
