PRIME CHALLENGE Make Life Better - Unicity

Like This Page · August 19, 2013 ·

Just two years out of medical school, I have already seen, despite the best efforts of conventional western medicine and people's best intentions, the deleterious effects of diabetes, cardiovascular disease in the form of heart attacks, strokes, Alzheimer's and other debilitating conditions. I have seen too many people lose one or two limbs to the knife, living hopeless lives, weary with the toll of the damage done having endured years of metabolic diseases.

There is a company that has addressed this issue, that has married the conventional wisdom of biological science with business and packaged it so that the people out there who are suffering or those strapped on to that conveyor belt towards suffering have a chance to redeem their health.

Bios Life Slim is an answer. Your heart will thank you for it.

- Dr. Daniel Thomas, MBBS
