

---

I have MS, and I was diagnosed in 1996. Three months ago I was invited to an informational Enzacta meeting and I went in my wheel chair. I started the PXP and approx 4 weeks later I WALKED into the Enzacta meeting!

I've been on PXP about 3 months now. I can now walk without my wheelchair, I still use a cane to help steady me. Another thing is that my digestive system works much better and I really notice the difference in my stools.

Because of my MS I used to sleep all day long. Now I am awake all day and even weaning off some medications with my Doctors approval! People that have MS cannot be in the heat and humidity for very long and now for the first time in a long time I can stand much more heat and humidity. I spend a lot of time outdoors now.

I suffered from erectile dysfunction and even that is much better. I am married and for over two years and have not gotten aroused. I sleep in bed with my wife and there has been no stiffness down there. After about two months on PXP I have been aroused periodically. This is a big surprise to me!

I am so excited to have the opportunity to use PXP, it has literally changed my life and would recommend it to anyone especially those with MS.
