"Immunocel Saved My Mom from Cancer"

Posted by Wellness Coach on September 18th, 2012

"I'm Not Going to Let That Happen to My Mom!"

My mother was diagnosed with ovarian cancer. On July 9, 2008, she had a 25 lb tumor removed along with two or more gallons of fluid. Ninety percent (90%) of this tumor was cancerous and was at stage 4. The cancer had begun to spread to the belly button, up her rib cage and to her lymphnodes. She remained in the hospital for one month due to complications. The doctor let us know that her condition was very serious and that he was not going to throw her away. He said he had women much older than she that was in worst shape and lived for at least five years.

We had just seven days before her first chemo treatment and I was determined to find something to help her get through these treatments. The doctor told me not to put her on herbs, because they were afraid the herbs would preserve the cancer cells. I just happened to see a friend of mine in the grocery store who was a distributor for immunotec. He told me that she needed to be on the immunocel. He said if she takes that, she probably won't lose her hair. Unfortunately, he didn't have any products handy. So I drove 30 minutes away to another friend who sold me her last two boxes, one Platinum and one regular.

She encouraged me to call Mr. Hollis Holloway, who in turn referred me to John Molson. I called John Molson who gave me instructions on how she should take the Immunocel. He suggested 6 packs per day. She took two platinum in the early morning, two regular at 12PM and the last two regular between 5-6PM.

To make a long story short, her doctor called me last night, Monday, November 24, 2008 at approximately 7PM on my cell phone to give me the results of her cal scan. He said she still has some water retention in the belly, but he doesn't see any cancer. He said he didn't see it in her lymphnodes or any thing. He said because of her size, he didn't want to make a mistake so he wanted her to still take her last two chemo treatments and that they would do cat scans periodically.

One week prior, I had given my mother literature to give him so he would know what she was taking. So I said, "Dr. Shahin, you know she's taking the Immunocel." He said, "yes, I know. I have a couple of other patients that take it, but the body doesn't absorb it well." I disputed what he said about the Immunocel. He wanted to know how did I hear about it. He said, "do you sell it?" I told him that my mother had two sisters to die from cancer in which one was given double doses of chemo which contributed to her death. I said I was not going to let that happen to my mom. I told him I became a distributor to get the percentage off the product, since I pay for it each month for her. I invited him to listen in on the conference call that was held this Monday, November 24, 2008. I said if you give me your email, I will send you the phone number so you can listen in on these calls. I said, "they are very informative and sometimes doctors are on these calls giving testimonies about what the product is doing for their patients." He said, "the next time you come, I will give you my information." So I'm looking forward to helping him become more informed about Immunotec as a Medical Research Company and its flag product Immunocel.

My mother started taking the Immunocel on September 10, 2008, September 17, 2008, she was scheduled for her 1st chemo treatment. She has had four chemo treatments to this date. So it hasn't been quite three months yet and she has experienced these extraordinary results.

I just want to thank all of the individuals that were instrumental in helping me have confidence in the product.

Jesse Hosglend, Joyce Livingston, Hollis Holloway, John Molson, Johnathan Jones [CellularHealth Foundation], Jim Spencer, Al Caccorile, Henrietta, and Fred West.

This experience will motivate me more fully to take advantage of every opportunity to introduce as many people as I can to Immunotec and the products!
