My dad is 64 this year. He was diagnosed with stage 4 lung cancer in Jan '15. The cancer spread to the lymph nodes and bones. He started oral chemo in Feb '15. At the same time he also started taking AgeLOC R2, Reishimax, Tegreen, Probio and MarineOmega. Doc advise not to take supplements. But in Mar '15 when he did his PET scan, the cancer at the lung and lymph node cannot be detected. 3 months later in Jun '15, all cancer cells cannot be detected. Even the doctor was shocked at my dad's results and told him to continue whatever he's doing. My dad believed that Nu Skin supplements has helped him in his energy level and very minimal side effects from chemo (only pimples all over). He also emphasize on being positive and not giving up!!
