Success Story: Valley Dale Animal Haven

"To whom it may concern,

"I have been experiencing the benefits of APA for a year or more in terms of more energy and mental clarity, however until an extraordinary event which occurred recently I had no idea of its real power.

"A friend of mine, Menkit, who's also a distributor of this product, brought in a very old sick cat named "Sushi" in December last year. When he first came in we tested him for leukemia. The results came out a very dark blue, which means he had an advanced case of leukemia. Our veterinarian advised us to put him down humanely, as there was really no hope for him. Another cat recently brought in to us, a kitten , also tested positive for leukemia, but with a light blue color. The vet held out hope for the kitten.

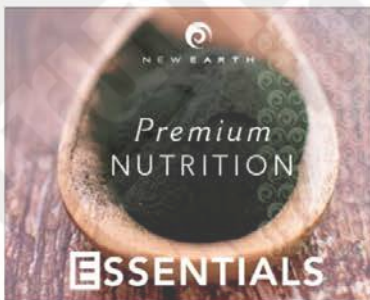

"Mankit suggested we try Sushi and the kitten on the algae (which had significantly helped Mankit heal from cancer 4 years ago). We gave Sushi, who weighed approximately 15 lbs, four capsules a day sprinkled on his tinned food every morning. The kitten ate two capsules every morning. A month to the day later we retested. The kitten came out completely clear, and Sushi came out a very light blue which is fantastic news for everyone! You can imagine our joy and relief. It mens that Sushi and the kitten both have a chance to live longer and healthier and maybe even be adopted. It also mens that in the future any cats we acquire with leukemia we can confidently and inexpensively heal them.

"So sick cat owners everywhere relax - there's hope!

"Sincerely,

Sandy Burgess
Manager

P.S. The algae is a food (extremely nutrient-dense) therefore does not conflict with other medications."
