1. Which Gillette blades fit my razor handle?

For the best shaving performance, we recommend using blades that are designed for your razor handle. To find this information, visit the product detail page for your specific razor, or if you’re interested in learning about all of the blades that are compatible with your razor handle, check out the chart below or download the complete list.

2. Where can I find Gillette coupons, samples, or promotions?
For current savings and offers on Gillette product check out our Coupons and offers.

3. What’s the difference between Gillette Power razors and non-Power razors?
Gillette makes power razors that have the same core elements as a manual razor, but will vibrate when turned on. The power razors require a AAA battery and can be activated by pushing the power button on the handle. The power razor will automatically shut off after 8 minutes, but can be turned on again. All power razors are Shower-safe®. Additionally, all power razor cartridges are interchangeable with their base manual cartridge, and in the case of the Fusion family of razors (Fusion, ProGlide, and Styler), all Fusion cartridges will fit all Fusion handles. Learn which blades are compatible with your handle.

4. How do I contact Gillette customer service or leave a comment?
If you have a question or comment about Gillette products, you can call 1-800-445-5388 or email us.

5. Which Gillette razor is the best for shaving and styling a beard?
Any Gillette razor is capable of helping you manage your beard, but using a more advanced razor makes the job that much easier. A multiblade shaving system, such as the Gillette Fusion ProGlide Power Razor with FlexBall™ Technology, has blades spaced closer together to help reduce the pressure on each blade for more comfort and less irritation.

If you need to do fine detail work on your beard, take a look at the Gillette ProGlide Styler–Beard Trimmer & Power Razor. This 3-in-1 styler trims evenly, shaves closely, and edges accurately with a Braun®-engineered power trimmer designed for maneuverability and precision.

To get ideas and inspiration for sculpting the beard you want, check out our Gillette facial-hair styling videos.

6. Is there a Gillette razor blade subscription or shave club service?
Yes, Gillette On Demand is a new online service that lets you quickly order blades as a one-time purchase or as a subscription...
* Valid for first-time customers for first order only. Offer terms subject to change.

** Credit applies to every 4th subscription order. Credits will be awarded for each unique subscription plan and value equal to the lowest of previous 3 subscription orders (incl. taxes).

7. How long does a Gillette Fusion ProGlide blade last?

Every Fusion ProGlide or ProShield blade delivers up to a month of shaves. To ensure a long-lasting lubrastrip, store your razor in the included organizer tray or face up—away from damp surfaces. If you’re not completely satisfied with our Gillette Fusion ProGlide or ProShield blade, find out how you can get your money back.

8. Are used Gillette blades and handles recyclable?

At the present time, our razors and cartridges do not qualify as recyclable. For information about P&G’s sustainability efforts, please visit our corporate sustainability site.

9. Can Gillette give me tips on how to shave better?

With more than a century of experience and innovation backing our products, we know a thing or two about shaving. Get started with the face shaving how-to articles and videos on our site. After you have the basics down, you can explore our videos on manscaping and facial-hair styling. And you’ll find even more videos on the Gillette YouTube™ page.

10. Where are Gillette products made?

Gillette blades have been made in Boston since 1905. As global demand for our product has increased, we have expanded our manufacturing capacity to multiple countries around the world. However, we continue to proudly manufacture Gillette’s best blades in our hometown of Boston, Massachusetts.

11. Why should I use a separate Gillette razor for shaving body hair?

The Gillette BODY razor is built specifically for grooming the male terrain (or as some call it, “manscaping”). With no corners or sharp edges, the innovative rounded, forward-pivoting head maneuvers around tricky areas comfortably and easily adapts to contours. The anti-slip, ergonomic handle provides exceptional control, even in the shower, and is designed for all of the different grips it takes to reach your shaving zones. Plus, there are three lubricating strips for outstanding glide. If you use the proper body-shaving techniques, a Gillette BODY razor is the perfect tool for managing your body hair.

12. Which ingredients are used in Gillette deodorants and antiperspirants?

On our website, every product-detail page for Gillette deodorants and antiperspirants includes an “Ingredients” tab that shows the particular product’s active and inactive ingredients. You also can find information about all of our fragrance components in the P&G Perfume & Scents list.
14. Where can I find information about Gillette women’s razors?

The Gillette Venus razor is designed exclusively for a woman’s unique curves and contours, and is the #1-selling female razor brand worldwide. Learn more at www.gillettevenus.com. There is also a Gillette Shave Plan for Venus razor blades. You can find out more and sign up for your Venus shave plan here.
