Several years in the making; it seems that instead of having to spend so much time reading and studying to increase one's intelligence, there is now a quicker way to enhance your brain without having to study. There is a product called Accelleral that is supposed to be a type of brain booster for those who take it. Despite testimonials that state the pills live up to the hype, is Accelleral the smart pill that the world has been waiting for?

What is Accelleral?

Although people have tried various ways to increase an individual's intelligence without having to work hard to achieve this, a pill known as Accelleral is gaining popularity as a revolutionary brain supplement that will [boost the power of your brain](#). Bill Gates actually claimed during a prior interview with Bill O' Reilly that his brain is sharper than ever, more clear and focused and he credits a large part to using Accelleral.

Source: BBC

Gates went on to say that "the brain is like a muscle, you got to work it out and use supplements just like body builders use, but for your brain, and that's exactly what I've been doing to enhance my mental capabilities. It is important to stimulate protein synthesis for ultimate brain boost and that's exactly what Accelleral does."

Others are said to have used this product from athletes like Tom Brady to those in the acting business-like Robert De Niro and praise the effectiveness of this brain booster. Though it is said to have the potential to connect parts of the brain that was not previously connected, double one's IQ and skyrocket an individual's energy levels, one question to ask would be is it safe?

Is Accelleral Safe to Use?

Harvard assembled a team of neuroscientists over a decade ago to work on creating a natural brain supplement with the ability to boost IQ effortlessly; today, those scientists were able to make a breakthrough in their research which led to a discovery of a lifetime! The result of their effort was developing a smart drug that boosts an individual's brain that surpasses the limits of known science. This new supplement is considered now to be the most successful available treatment to boost one's overall IQ, improve memory, increase focus and sharpen attention; numerous rounds of testing led to astonishing results where test subjects raved about the results.

Dr. Rosenhouse, the lead researcher on the team, gave an exclusive look inside the ingredients that have combined to [produce this unique smart drug](#). He said that it is engineered with all the ingredients containing vitamins and essentials that your brain needs to ensure improvement in all aspects of cognitive growth, while including short and long-term memory, focus, energy, problem solving capabilities and total brain performance. We are all very grateful to have this now, as I believe it can help everyone on the planet and take us to the next stage of evolution. We're very proud.

Dr. Cortigan, his associate, added to what Dr. Rosenhouse said by saying this revolutionary brain booster enables your brain to be the most efficient it can. It energizes the tissue and functions deep at a cellular level. It makes your brain cells perform their task genuinely and keeps away all kinds of mental fatigue or weakness. It's truly a remarkable breakthrough.

While it seems that this brain supplement is safe to use, many are wondering if this can be effective for your average person. Unfortunately, the only way to find out is to find

out yourself as the Harvard team has patented as well as sold the rights to important manufacturers who presently have a three-month supply, but it is limited. Since a person's life can change (for the good or the bad) with a simple decision, it is up to the individual to determine whether to move along or take a chance in trying this new *smart drug*.
