Personal Retail Sales Volume (PRSV) - PRSV is generated by the sale of an IBO to a Retail Customer who is not participating in the IML Compensation Plan. Each Personally enrolled Retail Customer generates 145 PRSV. For example, (2) customers is 290 PRSV.

Personal Sales Volume (PSV) - PSV is the sum of all personally sold Platinum Packages to retail Customers and IBO's. This means your PSV includes your PRSV.

Active Members - This refers to the number of Active IBOs and Customers in your uni-level organization.

Leg Rule - When achieving rank, no more than 40% of the Group Volume from any single uni-level leg may count towards your rank.

Customer Rule - When achieving rank, a minimum of 55% of the group volume must be from retail customers in each leg. This means that each leg in your unilevel must contain 55% Active Retail Customers if you want to count 100% of the volume for that leg.

Example, if a leg has 435 Customer Volume, then 435 must be equal to 55% in that leg. Therefore the maximum volume you are allowed to have in that leg is 791 because $791 \times 55\% = 435$. This number can change the more customer volume you have per leg.

Please refer to the back office for more detail video explanations.
