From ACMA Patient Group on Jul. 28, 2006:

Regarding the AIDS/HIV treatment, I am a physician who has referred 2 patients to Dr Xu for HIV therapy. One had been on medication but had significant side effects. He began the Chinese herbs from Dr Xu and for over one year maintained excellent lab results and avoided the side effects of the prescription meds. The other had great response from prescription meds and no side effects to speak of but wanted to supplement his immune system with the herbs and possibly stop the prescriptions in the future. He has not begun the herb treatment as yet.
